

**COMMENTS/QUESTIONS TO SOLICITATION**  
**26 August 2005**

C.4 2005:Jul:14:17:11:43	C.4.2	<p>C.4.2 states: <input type="checkbox"/> Upon expiration of the lease agreement of equipment listed in TE-3, TE-7, and TE-19, the SP shall replace the equipment and title will remain with the SP. <input type="checkbox"/></p> <p>Have not found any reference to leases, terms of leases and expiration dates in any of the TEs.</p>	<p>A joint inventory of equipment will be performed during the initial phase-in period. Any leased equipment found during that inventory, and not captured in the TE's will be handled as GFP. The SP will be made responsible for lease through modification to contract. The SP will then handle this newly added equipment as refresh equipment as specified in section C.4.1.</p>
C.5.7 2005:Jul:20:14:51:52	C.5.7	<p>Clarify whether work to be performed outside the continental US only applies to emergency ops and where equitable adjustment is made.</p>	<p>Work for customers at non-USACE sites (within and outside the US) is outside the scope of the Solicitation and is therefore a mod to the contract.</p>
C.5.7 2005:Aug:12:13:44:46	C.5.7.2.1; 5.7.3.2; 5.7.3.1	<p>Topic: av services, photography services and videography and travel</p> <p>Who pays travel costs for these unknown locations?; Providing services does not necessarily mean paying travel costs.</p>	<p>"All costs required to provide the services discussed in paragraphs C.5.7.2.1; 5.7.3.2; 5.7.3.1 are to be included in the fixed price bid schedule"</p>
C.5.7 2005:Jul:14:17:48:02	C.5.7	<p>video production services - providing actors and narrators SP provides. Is this cost reimbursable?</p>	<p>First approved Answer: In section B of the Solicitation para C.5.7.3.3 is not part of the fixed price bid. See cut from bid form below. Note this is not Cost Reimbursable the type of modification will be determined at the time of need by the KO as stated below.</p> <p>Two answers. We need to clarify with Mr. De Pue before publishing.</p> <p>Second approved answer: See Section B of the Solicitation.</p>
C.5.7 2005:Aug:12:13:40:46	C.5.7 - C.5.7.10.3	<p>There appears to be no limit to the amount of VI work that can be requested under the fixed fee pricing. It is understood that innovation is expected, but in VI the SP is requested to provide the listed services. It appears that the SP must staff to the level of the historic workloads, statements to the contrary notwithstanding. Is this a true statement? Can a more accurate expectation of workload be given? Are there any provisions for request going above historic averages being adjusted through a modification or cost-reimbursable clause; for example, little computer animation is done now, but if there is no additional cost to the Corps under the fixed price, then the demand could increase</p>	<p>Yes, workload information in TE-2 is the most accurate available.</p>

		dramatically.	
RFP 2005:Aug:22:13:58:26	Section B CLIN 004	The contractor will be carrying the cost of these services (a-d) for a period (pending reimbursement). Amendment Two provided the Historical Data on Postage Costs. Similar data is required for : a.Circuits and Wireless b.Printing Services c.Copier Paper Please provide the expected annual value for the 3 additional items	This information will be identified jointly by the SP and the government during the one year phase in period.
