

# **Technical Exhibit 17**

## **Unique Missions and Workload**

The purpose of this exhibit is to provide prospective Service Providers (SPs) insight into the scope and complexity of this mission.

This Technical Exhibit (TE) indicates unique missions and workload reported by the incumbent SP at different locations within USACE that contain IMIT responsibilities. The purpose of this exhibit is to provide prospective SPs with the identification and location of these missions. A yellow box indicates the existence of a mission corresponding to the title on the same line within the organization identified by the column title. Details may be gained by viewing TE-2, TE-3, TE-6, and TE-7 in corresponding organizations. Prospective SPs should not let this data restrict their use of creative or innovative performance solutions that successfully meet the performance requirements stated throughout the contract.

This data was collected in 2004. It is not all-inclusive and may not precisely represent the situation at the time of the advertisement for the solicitation.
