Technical POC:

Contracting Officer:

Synopsis: The contractor will supply and deliver the specified GCL to a site along the Tioga River in Mansfield, Pennsylvania.

The GCL will be manufactured to form a bentonite needle-punched geotextile composite. No adhesives or glue shall be used in lieu of the needle punch process.

One geotextile layer shall be woven. The other geotextile layer shall be nonwoven.

The GCL will have self-seaming capabilities for longitudinal overlaps.

Methods of shipping, storing, and handling shall conform to the manufacturer's requirements to prevent damage to the GCL. Folded materials shall be rejected.

In addition to the requirements presented above, the GCL shall meet the additional requirements summarized in the tabulation below:
