**Technical POC:** Peggy J. McBride, 410-962-4370  
Email [Peggy.J.McBride@usace.army.mil](mailto:Peggy.J.McBride@usace.army.mil)

**Synopsis:** Currently Earth covered storage magazines (igloos) have a two step differential between the pavement and the igloo floor. This 1942 design was intended for small packaged hand carried munitions which required no additional material handling equipment. However, today's larger munitions require forklifts to move munitions in and out of the storage igloos through a four foot wide door. A step differential from the apron to the door of the igloo requires ammunition handlers to setup of temporary metal ramps to allow forklifts to enter the igloos. Today's larger missile containers require two munitions handlers to straddle these large containers end to end through the four foot wide doors in order to store and retrieve them.

This project will consist of replace and modify 107 igloo doors and associated aprons. Change existing igloo door openings from four-foot wide, single-leaf function, to ten-foot wide openings with double-leaf security doors. Replace existing aprons eliminating steps, and provide new concrete ramps and paved aprons assuring continuous ramp access to facilitate handling, storage, and transport of joint service missiles and large Class-V items.

The proposed procurement is unrestricted. NAICS: 236210 with a business size standard of \$33.5 million in average annual receipts over preceding three fiscal years. Estimated cost of services is between \$5,000,000 to \$10,000,000.

Proposals can be submitted after the solicitation announcement by mail to:

U. S. Army Corps of Engineers  
Attn: CENAB-CT (Contracting Division)  
P. O. Box 1715  
Baltimore, MD 21203

Or in person at:

U.S. Army Corps of Engineers  
City Crescent Building, Room 7000  
10 South Howard St.  
Baltimore, MD 21201

All questions shall be submitted via email to
