INTERIM APPROVED JURISDICTIONAL DETERMINATION FORM U.S. Army Corps of Engineers

This form should be completed by following the instructions provided in the Interim Approved Jurisdictional Determination Form User Manual.

SECTION I: BACKGROUND INFORMATION

A. COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (AJD): December 17, 2019

B. ORM NUMBER IN APPROPRIATE FORMAT (e.g., HQ-2015-00001-SMJ): NAB-2014-01949 (Woodlawn Village, Fast Tract/ A.ID)

East Tract/ AJD)
C. PROJECT LOCATION AND BACKGROUND INFORMATION: State:VA County/parish/borough: Fort Belvoir City: Center coordinates of site (lat/long in degree decimal format): Lat. 38.73306, Long77.12333. Map(s)/diagram(s) of review area (including map identifying single point of entry (SPOE) watershed and/or potential jurisdictional areas where applicable) is/are: □attached ☑ in report/map titled Jurisdictional Determination Renewal: Woodlawn Village - East Berman Tract (±57 acres). □ Other sites (e.g., offsite mitigation sites, disposal sites, etc.) are associated with this action and are recorded on a different jurisdictional determination (JD) form. List JD form ID numbers (e.g., HQ-2015-00001-SMJ-1): .
 D. REVIEW PERFORMED FOR SITE EVALUATION: ☑ Office (Desk) Determination Only. Date: November 22, 2019. ☑ Office (Desk) and Field Determination. Office/Desk Dates: Field Date(s): .
SECTION II: DATA SOURCES Check all that were used to aid in the determination and attach data/maps to this AJD form and/or references/citations in the administrative record, as appropriate. ☑ Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant. Title/Date: "Woodlawn Village - East Berman Tract". ☑ Data sheets prepared/submitted by or on behalf of the applicant/consultant. ☐ Data sheets/delineation report are sufficient for purposes of AJD form. Title/Date: ☐ Data sheets/delineation report are not sufficient for purposes of AJD form. Summarize rationale and include information on revised data sheets/delineation report that this AJD form has relied upon: Revised Title/Date:
 □ Data sheets prepared by the Corps. Title/Date: □ Corps navigable waters study. Title/Date: □ CorpsMap ORM map layers. Title/Date: □ USGS Hydrologic Atlas. Title/Date: □ USGS, NHD, or WBD data/maps. Title/Date: □ USGS 8, 10 and/or 12 digit HUC maps. HUC number: □ USGS maps. Scale & quad name and date: □ USDA NRCS Soil Survey. Citation: □ USFWS National Wetlands Inventory maps. Citation: □ State/Local wetland inventory maps. Citation: □ FEMA/FIRM maps. Citation: □ Photographs: ☑ Aerial. Citation: Spring 2012 Natural Color Imagery from Aerometric, Inc.; Spring 2017 Near
Color Infrared Imagery from Virginia Base Mapping Program (VBMP), and Spring 2018 Natural Color Imagery from VBMP. or Other. Citation: Ground photographs submitted in the delineation report by WSSI, September 2019.

Page 1 of 7 Version: October 1, 2015

	Previous JDs. File no. and date of JD letter: NAB-2014-01949, issued November 18, 2014. Applicable/supporting case law:				
	Applicable/supporting scientific literature: . Other information (please specify): .				
<u>SE</u>	SECTION III: SUMMARY OF FINDINGS				
<u>Cc</u>	omplete ORM "Aquatic Resource Upload Sheet" or Export and Print the Aquatic Resource Screen from ORM for All Waters and Features, Regardless of Jurisdictional Status – Required				
NC 10	RIVERS AND HARBORS ACT (RHA) SECTION 10 DETERMINATION OF JURISDICTION: "navigable waters of the U.S." within RHA jurisdiction (as defined by 33 CFR part 329) in the review area. • Complete Table 1 - Required TE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to ow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.				
CV	CLEAN WATER ACT (CWA) SECTION 404 DETERMINATION OF JURISDICTION: "waters of the U.S." within I/A jurisdiction (as defined by 33 CFR part 328.3) in the review area. Check all that apply. (a)(1): All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide. (Traditional Navigable Waters (TNWs))				
	 Complete Table 1 - Required ☐ This AJD includes a case-specific (a)(1) TNW (Section 404 navigable-in-fact) determination on a water that has not previously been designated as such. Documentation required for this case-specific (a)(1) TNW determination is attached. (a)(2): All interstate waters, including interstate wetlands. Complete Table 2 - Required (a)(3): The territorial seas. 				
	 Complete Table 3 - Required (a)(4): All impoundments of waters otherwise identified as waters of the U.S. under 33 CFR part 328.3. Complete Table 4 - Required (a)(5): All tributaries, as defined in 33 CFR part 328.3, of waters identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3. 				
	 Complete Table 5 - Required (a)(6): All waters adjacent to a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3, including wetlands, ponds, lakes, oxbows, impoundments, and similar waters. Complete Table 6 - Required ☑ Bordering/Contiguous. Neighboring: 				
	 (c)(2)(i): All waters located within 100 feet of the ordinary high water mark (OHWM) of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3. (c)(2)(ii): All waters located within the 100-year floodplain of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3 and not more than 1,500 feet of the OHWM of such water. (c)(2)(iii): All waters located within 1,500 feet of the high tide line of a water identified in paragraphs (a)(1) or (a)(3) of 33 CFR part 328.3, and all waters within 1,500 feet of the OHWM of the Great Lakes. 				
	 (a)(7): All waters identified in 33 CFR 328.3(a)(7)(i)-(v) where they are determined, on a case-specific basis, to have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3. Complete Table 7 for the significant nexus determination. Attach a map delineating the SPOE watershed boundary with (a)(7) waters identified in the similarly situated analysis Required Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent 				
	and require a case-specific significant nexus determination. (a)(8): All waters located within the 100-year floodplain of a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3 not covered by (c)(2)(ii) above and all waters located within 4,000 feet of the high tide line or OHWM of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3 where they are determined on a case-specific basis to have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.				

Page 2 of 7 Version: October 1, 2015

Include: normal farr	Complete Table 8 for the significant nexus determination. Attach a map delineating the SPOE watershed boundary with (a)(8) waters identified in the similarly situated analysis Required is water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, ming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent a case-specific significant nexus determination.
	ERS OF THE U.S. FINDINGS:
Check all that	
	area is comprised entirely of dry land.
)(7) Waters: Waters that DO NOT have a significant nexus to a water identified in paragraphs (a)(1)-
• (Complete Table 9 and attach a map delineating the SPOE watershed boundary with potential a)(7) waters identified in the similarly situated analysis Required
	s water(s) that are geographically and physically adjacent per (a)(6), but are being used for established,
	ming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent
	e a case-specific significant nexus determination.
)(8) Waters: Waters that DO NOT have a significant nexus to a water identified in paragraphs (a)(1)-
	S CFR part 328.3. Complete Table 9 and attach a map delineating the SPOE watershed boundary with potential
	a)(8) waters identified in the similarly situated analysis Required
	s water(s) that are geographically and physically adjacent per (a)(6), but are being used for established,
	ming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent
	e a case-specific significant nexus determination.
	daters (Non-Waters of U.S.), even where they otherwise meet the terms of paragraphs (a)(4)-(a)(8):
	Complete Table 10 - Required Vaste treatment systems, including treatment ponds or lagoons designed to meet the requirements of
the CW	
_	Prior converted cropland.
	: Ditches with ephemeral flow that are not a relocated tributary or excavated in a tributary.
	: Ditches with intermittent flow that are not a relocated tributary, excavated in a tributary, or drain
wetland	ds.): Ditches that do not flow, either directly or through another water, into a water identified in
	aphs (a)(1)-(a)(3).
	: Artificially irrigated areas that would revert to dry land should application of water to that area cease.
): Artificial, constructed lakes and ponds created in dry land such as farm and stock watering ponds,
	on ponds, settling basins, fields flooded for rice growing, log cleaning ponds, or cooling ponds.
): Artificial reflecting pools or swimming pools created in dry land. ¹
	y): Small ornamental waters created in dry land. ¹): Water-filled depressions created in dry land incidental to mining or construction activity, including
	cavated for obtaining fill, sand, or gravel that fill with water.
	i): Erosional features, including gullies, rills, and other ephemeral features that do not meet the
definition	on of tributary, non-wetland swales, and lawfully constructed grassed waterways.1
	ii): Puddles. ¹
	Groundwater, including groundwater drained through subsurface drainage systems. ¹
land. ¹	Stormwater control features constructed to convey, treat, or store stormwater that are created in dry
	Vastewater recycling structures created in dry land; detention and retention basins built for wastewater
	ng; groundwater recharge basins; percolation ponds built for wastewater recycling; and water
	tary structures built for wastewater recycling.
	urisdictional waters/features within review area that do not meet the definitions in 33 CFR 328.3 of
	b) waters and are not excluded waters identified in (b)(1)-(b)(7). Complete Table 11 - Required.
• (Joinplete Table 11 - Nequilleu.
D ADDITIONA	AL COMMENTS TO SUPPORT A.ID:

Page 3 of 7 Version: October 1, 2015

¹ In many cases these excluded features will not be specifically identified on the AJD form, unless specifically requested. Corps Districts may, in case-by-case instances, choose to identify some or all of these features within the review area.

Page 4 of 7 Version: October 1, 2015

Jurisdictional Waters of the U.S.

Default field entry is "N/A". Delete "N/A" and fill out all fields in the table where applicable for waters/features present in the review area.

Table 1. (a)(1) Traditional Navigable Waters

(a)(1) Waters Name	(a)(1) Criteria	Rationale to Support (a)(1) Designation Include High Tide Line or Ordinary High Water Mark indicators, when applicable.
N/A	Choose an item.	N/A

Table 2. (a)(2) Interstate Waters

(a)(2) Waters Name	Rationale to Support (a)(2) Designation	
N/A	N/A	

Table 3. (a)(3) Territorial Seas

(a)(3) Waters Name	Rationale to Support (a)(3) Designation	
N/A	N/A	

Table 4. (a)(4) Impoundments

(a)(4) Waters Name Rationale to Support (a)(4) Designation	
N/A	N/A
N/A	N/A

Page 5 of 7 Version: October 1, 2015

Table 5. (a)(5)Tributaries

(a)(5) Waters Name	Flow Regime	(a)(1)-(a)(3) Water Name to which this (a)(5) Tributary Flows	Tributary Breaks	Rationale for (a)(5) Designation and Additional Discussion. Identify flowpath to (a)(1)-(a)(3) water or attach map identifying the flowpath; explain any breaks or flow through excluded/non-jurisdictional features, etc.
N/A	Choose an item.	N/A	Choose an item.	N/A
N/A	Choose an item.	N/A	Choose an item.	N/A
N/A	Choose an item.	N/A	Choose an item.	N/A
N/A	Choose an item.	N/A	Choose an item.	N/A

Table 6. (a)(6) Adjacent Waters

(a)(6) Waters Name	(a)(1)-(a)(5) Water Name to which this Water is Adjacent	Rationale for (a)(6) Designation and Additional Discussion. Identify the type of water and how the limits of jurisdiction were established (e.g., wetland, 87 Manual/Regional Supplement); explain how the 100-year floodplain and/or the distance threshold was determined; whether this water extends beyond a threshold; explain if the water is part of a mosaic, etc.
W-1	Unnamed Tributary to Dogue Creek	A6BWB; the PFO wetland on site is an adjacent water – bordering/contiguous – with a wetland boundary. The limits of this wetland were determined using the 1987 Manual and Regional Supplement. The distance threshold was measured using AutoCAD with survey located wetlands.
W-3	Unnamed Tributary to Dogue Creek	A6BWB; the PFO wetland on site is an adjacent water – bordering/contiguous – with a wetland boundary. The limits of this wetland were determined using the 1987 Manual and Regional Supplement. The distance threshold was measured using AutoCAD with survey located wetlands.
W-5	Unnamed Tributary to Dogue Creek	A6BWB; the PFO wetland on site is an adjacent water – bordering/contiguous – with a wetland boundary. The limits of this wetland were determined using the 1987 Manual and Regional Supplement. The distance threshold was measured using AutoCAD with survey located wetlands.

Page 6 of 7 Version: October 1, 2015

W-6	Unnamed Tributary to Dogue Creek	A6BWB; the PFO wetland on site is an adjacent water – bordering/contiguous – with a wetland boundary. The limits of this wetland were determined using the 1987 Manual and Regional Supplement. The distance threshold was measured using AutoCAD with survey located wetlands.
W-8	Unnamed Tributary to Dogue Creek	A6BWB; the PFO wetland on site is an adjacent water – bordering/contiguous – with a wetland boundary. The limits of this wetland were determined using the 1987 Manual and Regional Supplement. The distance threshold was measured using AutoCAD with survey located wetlands.

Table 7. (a)(7) Waters

SPOE Name	(a)(7) Waters Name	(a)(1)-(a)(3) Water Name to which this Water has a Significant Nexus	Significant Nexus Determination Identify SPOE watershed; discuss whether any similarly situated waters were present and aggregated for SND; discuss data, provide analysis, and summarize how the waters have more than speculative or insubstantial effect on the physical, chemical, or biological integrity of the (a)(1)-(a)(3) water, etc.
N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A

Page 7 of 7 Version: October 1, 2015

Table 8. (a)(8) Waters

SPOE Name	(a)(8) Waters Name	(a)(1)-(a)(3) Water Name to which this Water has a Significant Nexus	Significant Nexus Determination Identify SPOE watershed; explain how 100-yr floodplain and/or the distance threshold was determined; discuss whether waters were determined to be similarly situated to subject water and aggregated for SND; discuss data, provide analysis, and then summarize how the waters have more than speculative or insubstantial effect the on the physical, chemical, or biological integrity of the (a)(1)-(a)(3) water, etc.
Dogue Creek	W-2	Dogue Creek	A8OWB; the PFO wetland is less than 4000 feet of OHWM, but not adjacent to and (a)(1)-(a)(5) water or within a 100-year FEMA flooplain. The limits of this wetland were determined using the 1987 Manual and Regional Supplement. The distance threshold was measured using AutoCAD with survey located wetlands. This wetland performs ecological functions such as sediment trapping; nutrient cycling; pollutant trapping, transformation, filtering, and transport; runoff storage; and provision of life cycle dependent aquatic habitat, all of which significantly affect the physical and chemical integrity of down stream TNWs.
Dogue Creek	W-4	Dogue Creek	A8OWB; the PFO wetland is less than 4000 feet of OHWM, but not adjacent to and (a)(1)-(a)(5) water or within a 100-year FEMA flooplain. The limits of this wetland were determined using the 1987 Manual and Regional Supplement. The distance threshold was measured using AutoCAD with survey located wetlands. This wetland performs ecological functions such as sediment trapping; nutrient cycling; pollutant trapping, transformation, filtering, and transport; runoff storage; and provision of life cycle dependent aquatic habitat, all of which significantly affect the physical and chemical integrity of down stream TNWs.
Dogue Creek	W-7	Dogue Creek	A8OWB; the PFO wetland is less than 4000 feet of OHWM, but not adjacent to and (a)(1)-(a)(5) water or within a 100-year FEMA flooplain. The limits of this wetland were determined using the 1987 Manual and Regional Supplement. The distance threshold was measured using AutoCAD with survey located wetlands. This wetland performs ecological functions such as sediment trapping; nutrient cycling; pollutant trapping, transformation, filtering, and transport; runoff storage; and provision of life cycle dependent aquatic habitat, all of which significantly affect the physical and chemical integrity of down stream TNWs.

Page 8 of 7 Version: October 1, 2015

Non-Jurisdictional Waters

Default field entry is "N/A". Delete "N/A" and fill out all fields in the table where applicable for waters/features present in the review area.

Table 9. Non-Waters/No Significant Nexus

SPOE Name	Non-(a)(7)/(a)(8) Waters Name	(a)(1)-(a)(3) Water Name to which this Water DOES NOT have a Significant Nexus	Basis for Determination that the Functions DO NOT Contribute Significantly to the Chemical, Physical, or Biological Integrity of the (a)(1)-(a)(3) Water. Identify SPOE watershed; explain how 100-yr floodplain and/or the distance threshold was determined; discuss whether waters were determined to be similarly situated to the subject water; discuss data, provide analysis, and summarize how the waters did not have more than a speculative or insubstantial effect on the physical, chemical, or biological integrity of the (a)(1)-(a)(3) water.
N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A

Table 10. Non-Waters/Excluded Waters and Features

Paragraph (b) Excluded Feature/Water Name	Rationale for Paragraph (b) Excluded Feature/Water and Additional Discussion.
N/A	N/A
N/A	N/A

Table 11. Non-Waters/Other

Other Non-Waters of U.S. Feature/Water Name	Rationale for Non-Waters of U.S. Feature/Water and Additional Discussion.
O-1	OTHERA8F; This wetland lacks significant nexus to Traditionally Navigable Waters, Insterstate waters/wetlands, and territorial seas. O-1 is located within a depressional area. There was no observed surface connection that would indicate that this wetland was connected with Waters of the US. This wetland has most likely formed from disturbance of the site from previous activities that occurred onsite. The wetland does not contribute to the chemical, physical or biological integrity of the downstream TNW.

Page 9 of 7 Version: October 1, 2015
