Business With Us

The U.S. Army Corps of Engineers has played a key role in the development and growth of the nation in peace and in war. For more than 200 years, the Corps has supported the nation's river-based commerce, protected established population centers, provided disaster response and constructed military facilities to protect our nation.

The Baltimore District (NAB) is a full service District that executes regional and national programs for USACE. In fiscal 2017, the District worked on 150 Civil Works projects and 850 active Military projects expending \$150 million and \$1.35 billion respectively. Baltimore District's Washington Aqueduct provides drinking water to our Nation's capital, producing an average of 150 million gallons per day.

Headquartered adjacent to Baltimore's Inner Harbor, the District provides engineering, construction, environmental and real estate expertise to a variety of important projects and customers. The 1,100 employees of the Baltimore District continue to serve the Mid-Atlantic States and the Nation.

Civil Works support encompasses the Susquehanna, Potomac, and upper Chesapeake Bay watersheds, and it spans across six states and the District of Columbia. NAB is responsible for 15 reservoirs with 11 recreation projects, 290 miles of federal navigation channels, 148 miles of federally-constructed levees, and has restored hundreds of acres of wildlife habitat in the Chesapeake Bay.

USACE: STAYING WORLD CLASS NOW AND INTO THE FUTURE

US Army Corps of Engineers®

ACHIEVE OUR VISION

Anticipate future conditions; take actions today to always be ready come what may.

USACE VISION
Engineering Solutions for the Nation's Toughest Challenges

DELIVER THE PROGRAM

Our credibility is based on our ability to achieve desired results on time and on budget.

USACE MISSION

Deliver vital engineering solutions, in collaboration with our partners, to secure our Nation, energize our economy, and reduce risk from disaster.

STRENGTHEN THE FOUNDATION

Doing routine tasks to a high standard enables everything else. A strong foundation empowers leaders to think strategically.

MISSION AREAS

- Military Programs
- Civil Works
- Geospatial Support
- Contingency Operations
- Research and Development

Baltimore District Mission

Operates corporately to deliver innovative and effective solutions to our customers' engineering challenges in a manner consistent with our values and our principles of environmental stewardship.

Baltimore District Vision

We create expertise that goes beyond current practice, push current technical capability to prepare for the future, advance the expectations of our customers, and become the preferred agent for future work
