Attn: Mark Mendelsohn

Re: Baltimore Harbor Anchorages

Dear Colonel Fiala:

We have reviewed the Draft Supplemental Environmental Assessment for the Baltimore Harbor Anchorages and Channels Project dated March 2001. The document addresses changes in the project plan since the project's authorization. As a result of these changes, the quantity of dredged material will be reduced from approximately 4.4 million cubic yards to approximately 3.9 million cubic yards. We have no objection to the proposed changes and no comments on the supplemental EA. If there are any questions, please contact George Ruddy at (410) 573-4528.

Sincerely,

for John P. Wolflin  
Supervisor  
Chesapeake Bay Field Office
