

Smith Island Recommended Plan

Fog Point Cove:

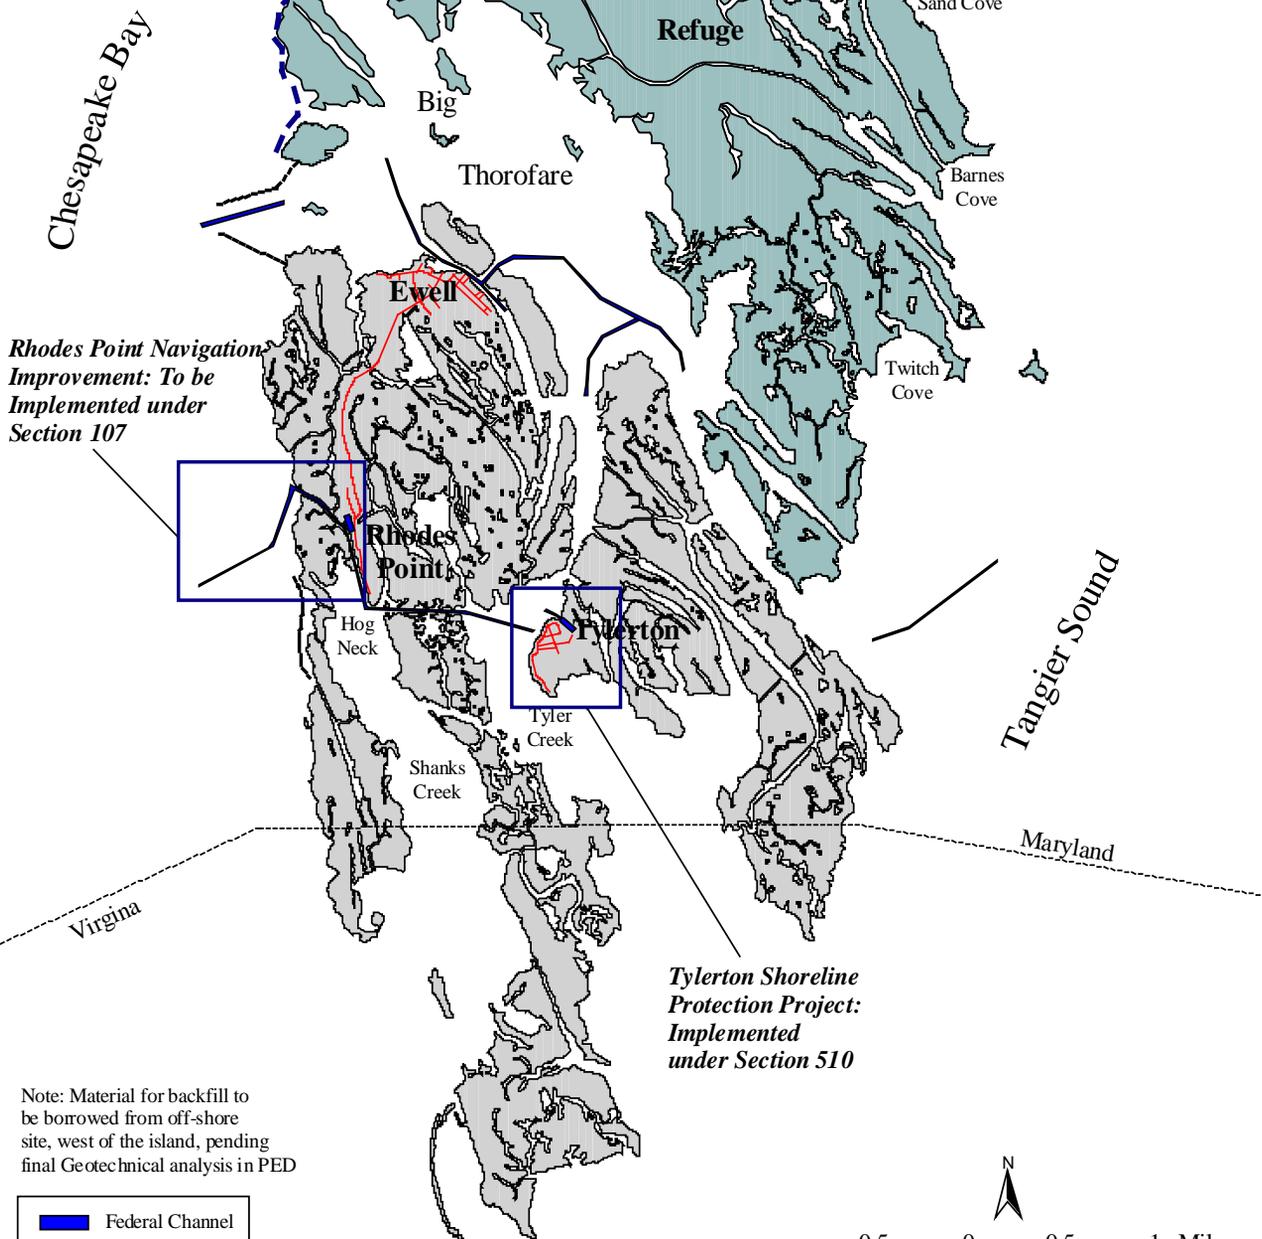

Cove extension (stone sill) from the western shoreline and stone breakwaters along the eastern edge. Backfill to create 3.8 acres of wetlands

Western Shoreline:

9,425 linear feet of off-shore breakwaters, located 30-100 ft. off-shore. Backfill to create 7.5 acres of wetlands

Back Cove:

Northwest and southeast breakwaters, 30 ft. off-shore, combined with backfill and 12 acres of wetland creation

Rhodes Point Navigation Improvement: To be Implemented under Section 107

Tylerton Shoreline Protection Project: Implemented under Section 510

Note: Material for backfill to be borrowed from off-shore site, west of the island, pending final Geotechnical analysis in PED
