

# Facility Management

US Army Corps  
of Engineers  
Baltimore District

- ▶ Facility Installation Planning
- ▶ Hazardous Substance Management Systems (HSMS)
- ▶ Land Use Planning
- ▶ Environmental Program Management
- ▶ Feasibility Studies
- ▶ Pollution Prevention Assessments
- ▶ Privatization Studies
- ▶ Infrastructure Analysis and Planning
- ▶ Economic Analysis

*Proper planning and management of facilities is critical to mission success of many organizations. Specialized services and tools to ensure this success should be fundamental to the daily operations of a facility.*

*The Baltimore District provides a comprehensive array of planning services, as listed above, to support the short and long-term management of facilities. We are well versed in the planning process and are able to assist in determining the effect of proposed planning and management decisions on the overall operation of a facility, its employees and residents, and the surrounding community. We are able to assess special requirements related to environmental issues, hazardous and solid wastes, and realignment and privatization initiatives.*

*Most importantly, our team is highly experienced in the application of applied technology to support facilities management. Whether for a complete campus or a single office, our experts can design a complete, integrated system to assist you in making more informed decisions in planning for your facility's future.*

For more information contact Mr. Robert F. Gore, Planning Division, at (410) 962-4995.
