- **Complete Table 1 - Required**

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

- **Complete Table 1 - Required**

- This AJD includes a case-specific (a)(1) TNW (Section 404 navigable-in-fact) determination on a water that has not previously been designated as such. Documentation required for this case-specific (a)(1) TNW determination is attached.

WUS 1	Intermittent	Chesapeake Bay	Yes	WUS 1 begin approximately 100 feet downstream of a stormwater management facility. WUS 1 limits, begin approximately 13 linear feet before the area of review limits. The tributary continues off site into Grey's Creek and then into the Chesapeake Bay.
WUS 2	Intermittent	Chesapeake Bay	Yes	WUS 2 begins at a headcut upstream of a stormwater management facility with bed and bank, ordinary high water mark, and intercepts ground water in addition to receiving stormwater from the upland LNG plant. Tributary 2 flows into Wetland B which is an open water stormwater management facility with emergent and forested wetlands along the banks. WUS 2 then outfalls into the natural channel alignment downstream of the pond. WUS 2 continues flow off site and into Greys Creek and into the Chesapeake bay.
WUS 3	Intermittent	Chesapeake Bay	Yes	WUS 3 is a natural channel with bed and bank, ordinary high water mark, and intercepts ground water in addition to receiving stormwater from the upland LNG plant. WUS 3 flows into a large open water storm water management pond that is surrounded by forested wetlands identified as Wetland 3. The forested wetlands contain multiple seeps. WUS 3 flows through the pond and outfalls downstream and directly into the Chesapeake Bay

Table 6. (a)(6) Adjacent Waters

(a)(6) Waters Name	(a)(1)-(a)(5) Water Name to which this Water is Adjacent	Rationale for (a)(6) Designation and Additional Discussion. Identify the type of water and how the limits of jurisdiction were established (e.g., wetland, 87 Manual/Regional Supplement); explain how the 100-year floodplain and/or the distance threshold was determined; whether this water extends beyond a threshold; explain if the water is part of a mosaic, etc.

Wetland B	WUS 2	Wetland B is a palustrian open water and emergent water impounded system. Limits were established using the 87 Manual and Coastal Plain Regional Supplement. The waters extend beyond the area of review.
Wetland C	WUS 3	Wetland C is a palustrian open water pond with emergent and forested wetlands adjacent. The limits of the pond and associated wetlands were delineated using the 87 Manual and Coastal Plain Regional Supplement. The waters extend beyond the area of review.
