

**U.S. ARMY CORPS OF ENGINEERS
REGULATORY PROGRAM
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
NAVIGABLE WATERS PROTECTION RULE**

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 9/8/2020

ORM Number: NAB-2020-00284 (Israel Total Life Ministeries/Approved JD)

Associated JDs:

Review Area Location¹: State/Territory: Maryland City: Waldof County/Parish/Borough: Charles County

Center Coordinates of Review Area: Latitude 38.613225 N Longitude -76.915733 W

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

B. Rivers and Harbors Act of 1899 Section 10 (§ 10)²

§ 10 Name	§ 10 Size		§ 10 Criteria	Rationale for § 10 Determination
N/A.	N/A.	N/A.	N/A.	N/A.

C. Clean Water Act Section 404

Territorial Seas and Traditional Navigable Waters ((a)(1) waters): ³				
(a)(1) Name	(a)(1) Size		(a)(1) Criteria	Rationale for (a)(1) Determination
N/A.	N/A.	N/A.	N/A.	N/A.

Tributaries ((a)(2) waters):				
(a)(2) Name	(a)(2) Size		(a)(2) Criteria	Rationale for (a)(2) Determination
N/A.	N/A.	N/A.	N/A.	N/A.

Lakes and ponds, and impoundments of jurisdictional waters ((a)(3) waters):				
(a)(3) Name	(a)(3) Size		(a)(3) Criteria	Rationale for (a)(3) Determination
N/A.	N/A.	N/A.	N/A.	N/A.

Adjacent wetlands ((a)(4) waters):				
(a)(4) Name	(a)(4) Size		(a)(4) Criteria	Rationale for (a)(4) Determination
N/A.	N/A.	N/A.	N/A.	N/A.

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

NAVIGABLE WATERS PROTECTION RULE**

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
Wetland A	1.77	acre(s)	(b)(1) Non-adjacent wetland.	Wetland A is an isolated wetland that receives water from the adjacent property and from stormwater. The wetland does not abut an a(1)-a(3) water, is not inundated by flooding, and it is not separated from an a(1)-a(3) water by a natural or manmade barrier. The wetland does not have a surface water connection to an a(1)-a(3) water.
Wetland B	0.05	acre(s)	(b)(1) Non-adjacent wetland.	Wetland B is an isolated wetland that receives water from stormwater. The wetland does not abut an a(1)-a(3) water, is not inundated by flooding, and it is not separated from an a(1)-a(3) water by a natural or manmade barrier. The wetland does not have a surface water connection to an a(1)- a(3) water. The wetland is bounded by the topography of the site and is situated along the railroad tracks. There is no known or field located culverts to carry flow under the railroad tracks into wetland or streams identified in NWI maps.

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

- Information submitted by, or on behalf of, the applicant/consultant: [Summary of Nontidal Wetlands/Waters for Property of Israel Total Life of Ministries, LLC dated April 2020](#)

This information is sufficient for purposes of this AJD.

Rationale:

- Data sheets prepared by the Corps: [Title\(s\) and/or date\(s\)](#).
- Photographs: [Aerial and Other: On site photos taken by the consultant during delineation and Aerial Imagery from Google Earth](#)
- Corps site visit(s) conducted on: [Date\(s\)](#).
- Previous Jurisdictional Determinations (AJDs or PJDs): [ORM Number\(s\) and date\(s\)](#).
- Antecedent Precipitation Tool: [provide detailed discussion in Section III.B.](#)
- USDA NRCS Soil Survey: [Figure 3-USDA-NRCS Web soil survey](#)
- USFWS NWI maps: [USFWS NWI Online Mapper](#)
- USGS topographic maps: [Figure 2- USGS 7.5 Minute LaPlata Quad](#)

Other data sources used to aid in this determination:

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

B. Typical year assessment(s): [N/A](#)

C. Additional comments to support AJD: [Wetland A drains into a culvert under Industrial Park Drive and into the stormwater system. The stormwater system comprises of a regional stormwater management facility that was constructed during the development of the area. The area development began in the late 1970's/early 1980's. During that time, the location of the stormwater facility was constructed in uplands and was used as an initial sediment trap during construction. The 1972 NRCS soil survey does not indicate any wetlands, streams, or other features at or near the project site.](#)
