REGULATORY PROGRAM
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
NAVIGABLE WATERS PROTECTION RULE**

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 8/26/2020
 ORM Number: **NAB-2013-02158(Reeder Property/Pre-App/Approved JD)**
 Associated JDs: NAB-2013-02158
 Review Area Location¹: State/Territory: Maryland City: Pasadena County/Parish/Borough: Anne Arundel
 Center Coordinates of Review Area: Latitude 39.123905 ° Longitude - 76.531081 °

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list **MUST** be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). **Rationale:** The Corps received a request for a Department of the Army (DA) approved jurisdictional determination (AJD) for the Reeder Property, located along Mountain Road and Edwin Raynor Boulevard, near Pasadena, in Anne Arundel County, Maryland. National Wetlands Index (NWI), National Hydrography Dataset (NHD), USGS Topo, and USDA web soil survey mapping indicates no aquatic resources are located within the review area. Additionally, the Reeder Property received an AJD from the Corps on 2 April 2014 which stated there were no wetlands or waters of the U.S. present within the "Review Area". Based on the documentation provided by the consultant and the Corps observations during the 18 May 2020 site visit, the Corps has determined the review area includes only dry land and no jurisdictional waters of the United States.
- There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

B. Rivers and Harbors Act of 1899 Section 10 (§ 10)²

§ 10 Name	§ 10 Size	§ 10 Criteria	Rationale for § 10 Determination

N/A.	N/A.	N/A.	N/A.

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
