

Public Participation

Public participation is an essential part of the National Environmental Policy Act process

- Treasury conducted public scoping from November 15 to December 15, 2019, to present the Proposed Action and identify issues of concern
- Treasury summarized the public scoping results in a [Public Scoping Report](#)
- Treasury considered and addressed public input from the scoping period during preparation of the Draft Environmental Impact Statement (EIS)

This is the second participation opportunity

- Treasury is holding a 45-day public review period for the Draft EIS from November 6 to December 21, 2020
- Please tell us of any thoughts or concerns you may have about the Proposed Action, alternatives, potential environmental impacts, and recommended mitigation measures
- Your input matters. Treasury will prepare a Final EIS that considers and responds to public comments received on the Draft EIS
