## **BALTIMORE DISTRICT PROGRAM TRENDS**

### **BALTIMORE DISTRICT PROJECTED PROGRAM FOR FY19**

## **ACQUISITION PLANNING AND STRATEGIES**

### Why do we do this?

- Required by regulation and policy
- Balance competing interests
  - ✓ small business & competition
  - ✓ strategic sourcing & consolidation

### Why talk about it today?

- Inform industry stakeholders Improve responses to our requirements
- Solicit feedback Improve delivery, innovate

## HOW WE DO ACQUISITION PLANNING

- Overall Acquisition Strategy Done at a District and Regional level at least twice a year
- Formal Greater than \$25M in a single year or \$50M
- Informal Below the formal approval level, Project Management Plan

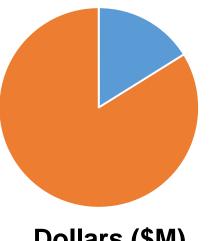

## **NEW OBLIGATIONS – PREVIOUS 12 MONTHS**

## **RAW WATER CONDUIT REPAIR**

- Provides for the structural repairs of a 9' diameter, unreinforced raw water conduit built in the 1980s that carries approximately 100 MGD of Potomac River water to the Dalecarlia Reservoir.
- Project elements are:
  - Repairs to approximately 15,000 LF of deteriorated sections of conduit via the application of a 2" shotcrete concrete layer.
  - ✓ Repairs to the above ground crossconnection structures
  - Locating and raising buried conduit access manholes.
- 15 month construction period.
- All construction work will be in a confined space under an actively travelled thoroughfare necessitating the need for extensive traffic control.

## **MCMILLAN FILTER BACKWASH TO SEWER**

- Provides direct discharge of filter backwash solids to DC sewer rather than placing the solids in the McMillan Reservoir Cove to accumulate for periodic removal.
- Project elements are:
  - Construction of a concrete equalization basin with two 300,000 gal. cells, each with an integral flushing system
  - Pumped discharge to the McMillan Cove Area, gravity flow to the DC Sewer
  - Provisions to retain gravity discharge to the McMillan Reservoir Cove
- 15 month construction period.
- Challenges are construction and tie-in without interruption of ongoing water treatment operations.

## **BALTIMORE DISTRICT BUSINESS WITH US**

#### www.nab.usace.army.mil

## **BALTIMORE DISTRICT BUSINESS WITH US**

IOME > BUSINESS WITH US

#### **Business With Us**

The U.S. Army Corps of Engineers has played a key role in the development and growth of the nation in peace and in war. For more than 200 years, the Corps has supported the nation's river-based commerce, protected established population centers, provided disaster response and constructed military facilities to protect our nation

The Baltimore District (NAB) is a full service District that executes regional and national programs for USACE. In fiscal 2017, the District worked on 150 Civil Works projects and 850 active Military projects expending \$150

million and \$1.35 billion respectively. Baltimore District's Washington Aqueduct provides drinking water to our Nation's capital, producing an average of 150 million gallons per day.

Headquartered adjacent to Baltimore's Inner Harbor, the District provides engineering, construction, environmental and real estate expertise to a variety of important projects and customers. The 1,100 employees of the Baltimore District continue to serve the Mid-Atlantic States and the Nation.

Civil Works support encompasses the Susquehanna, Potomac, and upper Chesapeake Bay watersheds, and it spans across six states and the District of Columbia. NAB is responsible for 15 reservoirs with 11 recreation projects, 290 miles of federal navigation channels, 148 miles of federally-constructed levees, and has restored hundreds of acres of wildlife habitat in the Chesapeake Bay

Military programs are primarily in Maryland. Pennsylvania, District of Columbia, northern Virginia, Delaware, and West Virginia. In addition to supporting service members at more than a dozen major military installations in the District's primary area of responsibility, NAB provides real estate, environmental, and specialized support to military and other Federal clients across the nation and the globe.

NAB fully supports the government policy of placing a fair proportion of its contracts for architect and engineering. environmental, construction and support services with qualified small, small disadvantaged, women-owned, HUBZone and service-disabled veteran-owned small businesses. In addition, such concerns are to also be afforded the maximum practicable opportunity to participate as subcontractors in qualifying contracts awarded to large businesses
