

ICC-B NORTH CAMPUS COMMUNITY UPDATE #3 July 27, 2012

Community Members,

The objective of this document is to update the community on information related to upcoming construction activities and general relevant project information. The project team appreciates the cooperation of the local community for a successful North Campus Project.

General information

- Project team continues to evaluate construction activities to minimize noise to neighbors. Decibel levels continue to be monitored to verify our compliance
- Sidewalk in front of ICC-B site will be very busy but properly controlled with flag men directing Project trucks, pedestrians, and cars. Use of the sidewalk on the “Safeway side” of the road would be recommended to minimize inconveniences. The project has experienced some aggressive drivers on Sangamore Road in regards to respecting the flagmen and signage, so we appreciate those that comply safely.
- Saturday work should be anticipated by the community.
- Community members can email specific project related concerns to the following email address iccnorthcampus@gmail.com.

In the next 4 weeks the following activities will be taking place:

- Remove curb / asphalt in specific area of construction – garage and lower portion of site (majority of pavement on eastern side of project will remain intact for a while to decrease disturbed area)
- Sediment Erosion control measures installed in compliance with MDE permit

- Occasional crane activity.
- Continued mass excavation and hauling of spoils off site (lots of dump trucks entering and exiting the site)
- Minor site utility installation / relocation
- Tree trimming / tree clearing / grubbing / chipping activities within the permitted limits of disturbance.

Thanks
