

Baltimore District's

FY20 Recreation

Prosperous Summer

Recreation.gov released their FY20 campground revenue report listing approximately 770 USACE campgrounds. Raystown Lake's Seven Points Campground and Tioga-Hammond and Cowanesque's Ives Run Campground came in at number one and number three, respectively.

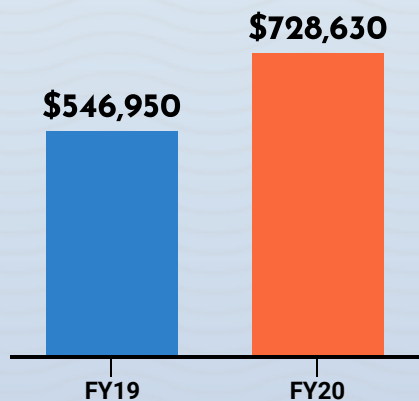

Health and safety have always been priorities at our recreation facilities. With trust embedded in Baltimore District's recreation employees who serve at these facilities, Seven Points and Ives Run campgrounds, among other campgrounds at these facilities, were allowed to reopen safely despite the COVID-19 pandemic. The team followed CDC guidelines and encouraged visitors to do the same. The sites welcomed high visitation levels, providing visitors an opportunity to get outdoors - an essential physical and mental health activity during the pandemic.

Seven Points Campground

26,918

*registered campers were provided safe outdoor family camping experience

\$728K total revenue of FY20

*Record collections do not include the first 8 weeks of camping season, due to COVID-19 restrictions, or the month of October.
