

**APPENDIX F**  
**Land Inventory**

## APPENDIX F - LAND INVENTORY

### 1.0 Purpose

The Water Infrastructure Improvements for the Nation of 2016 (WIIN) includes the following provision at P.L. 113-322. Sect. 1309:

SEC. 1309. HUNTINGDON COUNTY, PENNSYLVANIA.

*(a) In General.-The Secretary shall-*

*(1) Prioritize the updating of the master plan for the Juniata River and tributaries project, Huntingdon County, Pennsylvania, authorized by section 203 of the Flood Control Act of 1962 (Public Law 87-874; 76 Stat.1182); and*

*(2) Ensure that alternatives for additional recreation access and development at the project are fully assessed, evaluated, and incorporated as a part of the update.*

*(b) Participation.-The update referred to in sub-section (a) shall be done in coordination with all appropriate Federal agencies, elected officials, and members of the public.*

*(c) Inventory.-In carrying out the update under subsection (a), the Secretary shall include an inventory of those lands that are not necessary to carry out the authorized purposes of the project.*

This appendix of the Master Plan responds to the final requirement in §1309, the inventory of those lands that are not necessary to carry out the authorized purposes of the project. No further interpretation or guidance was furnished to the Baltimore District pertaining to this provision.

### 2.0 Project Authorities

The Flood Control Act of 1962 (Public Law 874, 87<sup>th</sup> Congress) authorized “the project for the Juniata River and tributaries.” The report of the Chief of Engineers dated 27 July 1962 recommended development of a multiple-purpose reservoir on the Raystown Branch of the Juniata River to provide for flood control, hydroelectric power, recreation, fish and wildlife, and low-flow augmentation for water-quality improvement.

The Board of Engineers for Rivers and Harbors originally recommended requiring local interests to fund a portion of the reservoir costs allocated to general and fish and wildlife recreation. This was in accordance with U.S. Army Corps of Engineers (USACE) procedures in effect at the time of the report. However the Chief of Engineers did not concur with the requirement for local interests to cost-share basic recreational services, saying, “*The cost-sharing procedures . . . have been under review for some time in recognition of the principle that provision of adequate opportunities for outdoor recreation is among the basic requirements of a sound national conservation program, and of growing public demands on Federal land and water areas.*” The Office of the Chief of Engineers later reaffirmed that cost sharing with regard to recreation development would not be required at Raystown.

### **3.0 History**

An earlier 575-acre reservoir existed at the site of Raystown Lake, created in 1911 by the Raystown Water and Power Company with a dam at Hawn's Bridge. By the 1960's, the dam was operated by the Pennsylvania Electric Company. The accessible portions of the shoreline of this pool were, for the most part, in private ownership. There were approximately 1,200 summer cottages along the stream and reservoir shoreline. Access to the reservoir by the general public was limited to one access point maintained by the Pennsylvania Fish Commission and four commercial marinas.

#### **3.1 Geography**

The reservoir is located in a narrow valley from which the heavily wooded slopes rise rapidly to the adjoining ridges. The ravines and valleys of tributary streams provide numerous water areas ranging from small coves to large inlets and bays. The steep and rugged topography of the shoreline limits the potential for high density recreational development. A significant portion of the area is steep and stony mountainous terrain with precipitous bluffs lining the river. The steep slope areas have sandstone and shale outcrops, with a minimum of top soil, and do not lend themselves to clearing or cultivation. Terrace Mountain forms much of the right bank and rises almost perpendicularly from the edge of the lake.

#### **3.2 Socioeconomics**

The area acquired included agricultural land, woodland, cottage, waste land, riverbed, and permanent residential sites as well as commercial areas. The 1967 estimate of individual tracts to be acquired was 1,800. The village of Aitch and a portion of the adjoining borough of Marklesburg were relocated. About 300 year-round residents and 15 commercial and special purpose properties were resettled.

The area was described as a rural district with a major economy of summer recreation. Agriculture provided a livelihood to most of the permanent residents of the area, but the majority of the farmers in the reservoir area supplemented their income with outside employment. Employment in the town of Huntingdon included garment and footwear manufacturing, other manufacturing, Juniata College and the Huntingdon Penitentiary.

### **4.0 Acquisition Planning and Authorization**

#### **4.1 Original Authorized Acquisition**

Real Estate Design Memorandum No. 5A for the Raystown Reservoir, dated September 1966, described the proposed acquisition of 18,770 acres as follows:

- A. The area to be inundated by the flood control pool (Elevation (812), together with the adjacent shoreline up to elevation 815 or up to a line measured 300 feet horizontally from elevation 812, whichever is greater (the guide take line). In the vicinity of the borough of Saxton, acquisition was limited to elevation 815. The area described by this guide take line was estimated at the time to be 8,484 acres to be purchased in fee.
- B. Downstream area of 374 acres to provide for a dam access road and to provide access to the river for fishing and related activities.
- C. Public access areas of 8,877 acres to be acquired to permit the maximum development and realization of the full project potential for recreation, wildlife mitigation, and for scenic and resource protection. The public access areas planned in 1966 included Seven Points, Upper Corners, Paradise Furnace, and Hawn's Bridge, plus three launching ramp areas. Access to the Paradise Furnace and Hawn's Bridge areas was planned from a scenic highway proposed by the Commonwealth of Pennsylvania.
- D. Purchase of acreage for mitigation above the guide taking line was required through consultation with the U.S. Fish and Wildlife Service. 1,035 acres were approved for acquisition in Real Estate Design Memorandum 5A for the purpose of increasing the carrying capacities of lands resulting in higher game populations and thus offsetting serious losses of habitat associated with inundation of agricultural lands. This was later revised to 1,470 acres. However, beginning in the 1994 Master Plan, "about" 3000 acres of mitigation land is reported. The Real Estate Management Information System (REMIS) currently reports 3,018 acres of mitigation land at Raystown.

#### **4.2 National Recreation Area Concept**

Plans for the Raystown Reservoir were revised in January 1967 to include the views of several agencies supporting the concept of Raystown as a National Recreation Area. The Commonwealth of Pennsylvania stated, in part, "*It is our hope that additional consideration will be given to the development of the site as a national recreation area. . . It should be noted that the natural beauty of the Raystown area will make the project one of the most outstanding scenic attractions in the State.*" The State Comprehensive Outdoor Recreation Plan (SCORP) stated at the time that Raystown Reservoir was being considered as a possible National Recreation Area and was shown as "proposed" in the listing of Federal Parks in the Commonwealth.

A letter report of the National Park Service (NPS) is contained in the General Design Memorandum, Design Memorandum No. 3. The report comments favorably upon the recreational potential of the area and indicates that the recreation significance

meets all the primary and secondary criteria for a national recreation area as set forth by the Recreation Advisory Council. In an analysis dated March 5, 1965, NPS recommends acquisition of a minimum of 14,000 acres of land above the USACE guide taking line, stating, *“The scenic value of the project will be an important part of the recreation experience of the visitor. The slope on the northeast side of the impoundment (Terrace Mountain) is the most significant scenic element of the project area . . . there seems to be some question as to USACE’ authority to acquire scenic resources.”* The letter goes on to recommend USACE recognize *“the need to protect this slope for project enhancement by land use controls or acquisition . . . Failure to protect a scenic slope could result in future impairment of the scenic resources of the project.”*

The report of the Bureau of Outdoor Recreation, also contained in Design Memorandum No. 3, discussed the project area potential as a national recreation area and recommended acquisition of substantial land areas beyond the normal guide taking line for recreational purposes.

#### **4.3 Changes to Planned Land Acquisition.**

Additional land was proposed for acquisition in accord with the recommendations of the Bureau of Outdoor Recreation for recreation areas, wildlife mitigation, and for scenic and resource protection. These changes, described in a January 1967 revision to Real Estate Design Memorandum No. 4A, included the following:

- A. Right-bank acquisition to place in public ownership all lands lying between existing State-owned forest and game lands and the reservoir, consisting of approximate 2,625 acres above the guide take line, to permit the incorporation of these State-owned lands into an uninterrupted recreational and wilderness complex.
  
- B. Left-bank acquisition to place in public ownership the adjacent ridges and valleys to permit the full development and protection of this rugged mountain area. The additional acquisition on the left bank, including acreage for game mitigation, consisted of approximately 10,000 acres above the guide take line.

#### **4.4 Proposed Scenic Highway**

Real Estate Design Memorandum 4A states, “The Commonwealth has proposed a scenic highway along the right bank of the project. . . This highway would open up the entire right bank for recreational development.” Illustrations to the Memoranda begin depicting this as a “proposed scenic road by others” beginning with revisions dating January 1966. The proposed scenic road would have provided better access to the proposed Hawn’s Bridge and Paradise Furnace Recreation Areas.

#### **4.5 Final Authorized Land Acquisition**

Real Estate Memorandum 5B, dated October 1967 estimated the authorized total acreage to be purchased in fee as 29,314 acres, more or less. As always occurs when such large acquisitions occur, numerous adjustments were made and documented, for purchase of uneconomic remnants, loss of access, and final taking line revisions. Current audited records (Real Estate Management Information System or REMIS) show the total fee acreage as 28,132.803 and total flowage easement acreage as 687.26. All changes made to the Real Estate Design Memorandum were completed in accordance with all guidance applicable at the time.

## **5.0 1988 Real Property Survey Report**

In 1985, Executive Order 12512 required agencies to identify, as appropriate, those areas of real property which were not utilized, underutilized, or not being put to optimum use, as defined in FPMR 101-47.801(a). In accordance with this order, a survey was conducted and a Real Property Survey Report for Raystown Lake was issued in 1987. This report is attached to this document as Attachment A.

The findings of the report include that the utilization was in accordance with the Land Use Classifications in the 1977 Master Plan current at the time. These classifications were: Flood Control Area, Dam Site and Downstream Enhancement Area, Wildlife Mitigation Area, Intensive Recreation Areas, Low Density Recreation Areas, Natural Areas, and Reserve Forest Land. The findings describe most developed recreation areas as "Overutilized." Several areas designated as Future Recreation areas which have not been developed were described as "Underutilized." The report further indicates that these areas would be developed either with federal funds or private capital, or through leasing to state or local governments as demand dictates.

This report designated two areas downstream from the dam as not needed for project purposes. Excess Parcel 1, depicted in Figure 1 is a portion of Tract 140, located west of Corbins Bridge, and approximately 88 acres in size. Excess Parcel 2, also depicted in Figure 1 is a portion of Tract 143 and is located east of Fishing Access Point No. 2. It is approximately 83 acres in size. Both were acquired from the Pennsylvania Electric Company as uneconomic remnants and are not needed for downstream flood control purposes.

These parcels were reported as excess to the General Services Administration (GSA). Although GSA disposed of a number of parcels of land declared excess at USACE lakes around the country, it declined to dispose of the parcels described above at Raystown Lake for reasons that are unclear.

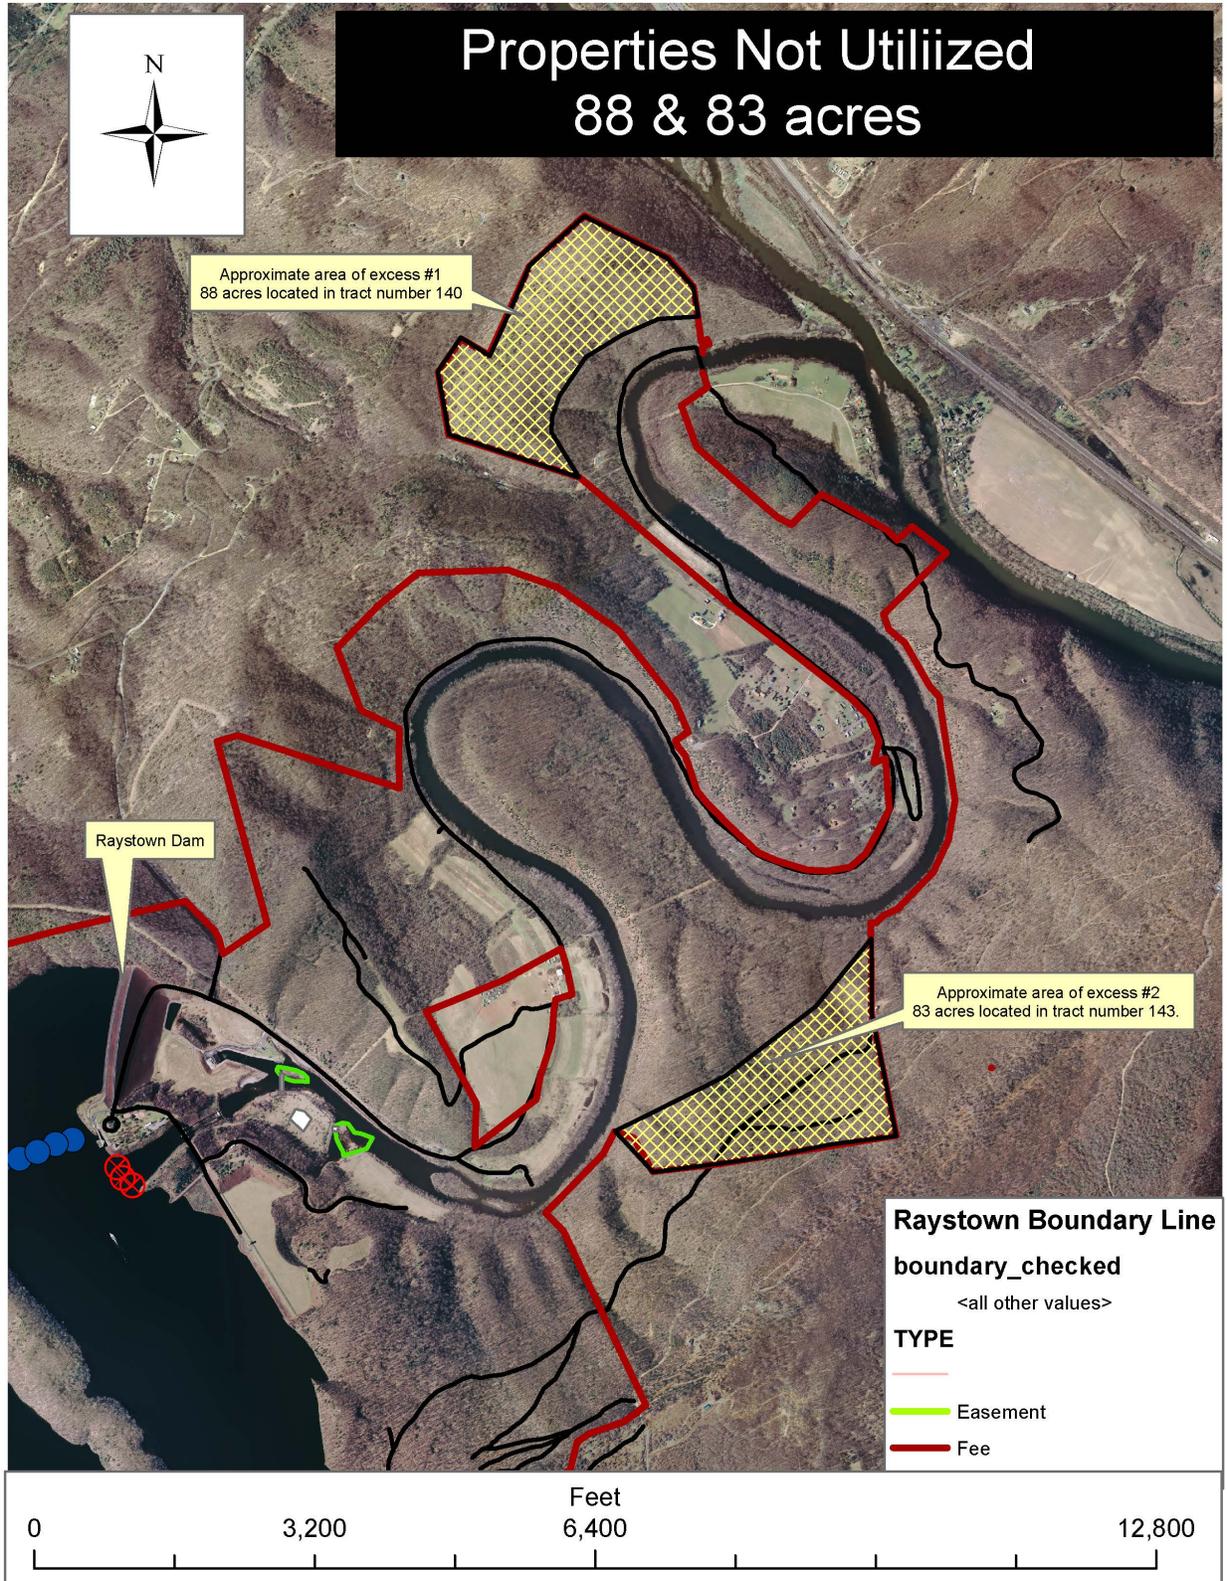

Figure 1: Location of identified excess tracts.

## **6.0 Proposed Additional Disposals**

During the acquisition phase of the construction of the Raystown Lake Project numerous plots of land in segments 34, 35, and 38 were acquired in fee, instead of acquiring flowage easement. This was due to the privately owned properties existing entirely, or significantly, below the 815' elevation flowage easement take line. In some cases the determination to acquire in fee was made to prevent partial fee acquisition, and in some cases the determination was made at the request of the property owner. In those cases where the property existed entirely or significantly below the 815' elevation, acquisition by fee was necessary due to the existence of a dwelling requiring removal, or because there was not necessary space to allow acceptable septic storage for proper sewage treatment. This acquisition plan was supported at that time by the Pennsylvania Department of Environmental Resources and by the Bedford County Sanitary Corporation who expressed concerns regarding possible water pollution.

Since the taking by fee of those properties it has been the obligation of the Raystown staff to maintain those fee owned properties according to the requirements of ER 1130-2-540. No private and exclusive use is permitted on these lands, which in many cases are surrounded by privately owned lands. Since the lands are not contiguous with the properties surrounding Raystown Lake, fee ownership of these lands is not necessary to carry out the authorized purposes of the project. It is also difficult to relate the requirement of fee ownership of these property segments to the adjacent landowners.

Since the taking of these lands during the acquisition phase of the Raystown Lake Project construction there have been no structures built, no septic tanks installed, nor any additional concerns for water pollution on any of these plots of land. Since the plots are not a part of Raystown's contiguous fee owned properties, it is not necessary to retain the fee ownership of these lands in order to carry out the authorized purposes of the project. The inclusion of a flowage restriction on these USACE owned plots would be an adequate restriction to prevent the construction of habitable structures, septic systems, and/or other unauthorized activities for flowage easement holdings. Therefore it is recommended that these nine plots be surveyed for inclusion of a flowage easement restriction and then processed for disposal from the fee ownership of the USACE.

We propose disposal of fee interest in the following tracts, listed below, retaining flowage easement to the elevation 815:

Tracts are listed here by real estate acquisition tract number: 3405, 3408, 3409, 3411, 3412; 3502, 3507, 3508, 3509, 3515, 3516, 3517, 3518, 3520, 3521, 3522, 3526, 3528, 3529; 3801-1, 3801-2, 3801-3, 3801-4, 3801-5, 3801-6, 3801-7, 3801-8, 3801-9, 3801-10, 3802, 3803, 3804, 3805, 3806, 3807, 3808, 3809, 3810, 3811, 3812, 3813, 3814, 3814-2, 3815, 3816, 3816-2, 3817, 3817-2, 3818, 3818-2, 3819, 3820, 3821, 3822, 3823, 3824, 3825, 3826, 3827, 3828, 3829, 3830, 3831, 3832, 3833, 3834, 3835, 3836, 3837, 3838, 3839, 3840, 3841, 3842, 3843, 3844, 3845, 3846, 3847, 3848, 3849, 3850,

3851, 3852, 3853, 3855, 3856, 3859, and 3862. These real estate tracts are contained in Land Use Classification Parcel(s): 5114 through 5122 as depicted in Appendix C of the Raystown Lake Master Plan of 2020.

## **7.0 Real Estate Utilization**

In 2019, a Report on Utilization of Civil Works Lands and Facilities was conducted at Raystown Lake in accordance with ER 405-1-12. The findings indicate that all buildings are effectively used, that there are no unused or excess buildings, and that there is no excess land. All land is being utilized in accordance with Land Use Classifications in the Master Plan. The report is included as Attachment B. The changes in Land Use Classifications proposed in this Master Plan revision are described in Chapter 8 Summary of Recommendations. Although several changes are proposed, in part to comply with changes to master plan guidance, all land will remain utilized consistent with the new Land Use Classifications and with all applicable Corps guidance and Federal law.

## **8.0 Findings**

With the exception of tracts described in (8) below, all public land at Raystown Lake is necessary to carry out the authorized purposes of the project.

The findings of the land inventory required at WIIN §1309(c) are as follows:

- (1) The acquisition of all project lands was approved in accordance with the laws, regulations and policy in place at the time of acquisition.
- (2) The land continues to be utilized for purposes for which it was acquired. All lands were acquired for purposes authorized by Congress. Those purposes continue to exist today, over 50 years later. While not every originally envisioned aspect of each purpose has become reality, the underlying purposes may still be fulfilled in some manner in the future.
- (3) Early conceptual designs for the project, dating from round 1967, depict a number of recreation areas and facilities that have not been constructed for a variety of reasons, including the failure of the proposed National Recreation Area and Scenic Parkway to materialize. While the land where these facilities were envisioned has not been developed into high density recreation areas, it is utilized to carry out authorized purposes of the project, including fish and wildlife conservation and public outdoor recreation. These lands are not considered separable recreation lands as described in EP1130-2-550, Change 5, 3-6, Chapter 4a. Land Allocation (2) in that the acquisition of separable lands normally requires a cost sharing sponsor, a non-federal operator, or were acquired by separate congressional authorization.

- (4) USACE guidance regarding stewardship of public land has evolved as federal agencies implemented the provisions of numerous environmental statutes enacted since the mid-1960s, including the National Environmental Policy Act and the Endangered Species Act. As a result, EP1130-2-540 2-4f (1)a requires USACE projects to manage communities to promote regional environmental values occurring on project lands toward sustaining ecosystems in which the project lands and waters occur. Such ecosystems and communities are required to be identified in resource objectives and/or land use classifications contained in the Master Plan.
- (5) The Land Use Classifications designated in Chapter 4 of this Master Plan comply with all applicable guidance and have been thoughtfully determined in accordance with the criteria in EP 1150-2-550 and the Resource Objectives set forth in Chapter 3.
- (6) The proposed Land Use Classifications are consistent with numerous goals set forth in the early planning stages of the project, as shown in Real Estate Design Memoranda 4A, 5A, and 5B, including:
- A. Provision of adequate opportunities for outdoor recreation.
  - B. Support of a sound national conservation program.
  - C. Realizing the full project potential for recreation, wildlife mitigation, and for scenic and resource protection.
  - D. The incorporation of State-owned lands into an uninterrupted recreational and wilderness complex.
  - E. Allowing the natural beauty of the Raystown area to become one of the most outstanding scenic attractions in the State.
  - F. Increasing the carrying capacities of lands resulting in higher game populations and thus offsetting serious losses of habitat.
  - G. Placing in public ownership the adjacent ridges and valleys to permit the full development and protection of this rugged mountain area.
  - H. Protecting the scenic value of the project, which was planned be an important part of the recreation experience of the visitor. The slope on the northeast side of the impoundment (Terrace Mountain) is described as the most significant scenic element of the project area.

- (7) The quantity of land was, in part, acquired with federal taxpayer funds in support of regional goals to protect and bring into public ownership the exceptional scenic and aesthetic qualities of Raystown Lake and its surroundings. The public land is an integral part of the lake's significant recreational, scenic, and habitat values. Private exclusive uses, such as private docks, have not been permitted at the lake, in compliance with ER 1130-2-406. In combination with the minimal pool fluctuation and the absence of private exclusive uses, the quantity of public land at Raystown Lake provides an exceptionally pristine appearance. During the Master Plan revision process, the public has made abundantly clear the value they place on keeping lands at Raystown in public ownership. See Chapter 7 Agency and Public Coordination.
- (8) Having already been declared excess to project needs, Excess Tract 1 and Excess Tract 2, as described in paragraph 6-f above have been determined to not be needed for project purposes. These two tracts remain unused and unneeded. Fee interest in the Saxton area tracts described in paragraph 6-g has also been determined to not be needed for project purposes. It is proposed that fee interest in these tracts be disposed of and a flowage easement as needed be retained by the USACE. If permissible under current guidance and approved as needed by higher authorities, these tracts may be disposed of by the General Services Administration pursuant to their requirements.

**APPENDIX F: Land Inventory**  
**ATTACHMENT A**

REAL PROPERTY SURVEY REPORT  
RAYSTOWN LAKE PROJECT, PENNSYLVANIA

1. **Purpose:** This survey of the Raystown Lake Project, Huntingdon County, Pennsylvania was conducted pursuant to provisions of Section 2 of Executive Order 12512 and as prescribed by Subpart 101-47.8 of the Federal Property Management Regulations (FPMR). This survey was made to identify, as appropriate, those areas of real property which were found to be not utilized, underutilized, or not being put to optimum use, as defined in FPMR 101-47.801 (a) at this activity.

2. **Utilization:**

a. **Land:** The Raystown Lake Project has a total of 29,903.43 fee acres and 802.04 acres of flowage easements. The property is in a rural area and the surrounding land has been largely static in value, due to an existing poor economy in the area. Land can vary from \$400.00 to \$4,000.00 per acre in Huntingdon County depending on its location as well as its access to acceptable water and improved roadways. Much of this land consists of hillside property, which is not suitable for building. Costs can also vary depending on the size of the property.

b. **Outgrants:** Currently there are 69 outgrants, consisting of the following instruments:

Leases	9
Easements	50
Permits	5
Licenses	4
Consent	1

The purpose of each outgrant is defined on the attached Report of Compliance Inspections at Exhibit "D".

c. **Mineral Activity:** There is not a major amount of mining activity in the Raystown Lake area. There are only three tracts making up a total 0.71 of an acre which are subject to an individual 1/3 interest in all mineral deposits.

d. **History:** The Raystown Lake Project was authorized by the Flood Control Act of 1962 (Public Law 87-874 87th Congress). The original 28,444.99 acres fee and 655.56 acres of flowage easements were acquired from 1968 to 1978 through purchase and condemnation from individual landowners. The project was designed and constructed under direction of the Baltimore District, Corps of Engineers. The construction of the dam and appurtenant works were operationally completed in October 1973.

e. **Improvements:** The following lists all buildings, along with their available utilities and their descriptions:

Building	Type	Sq. Ft.	Utilities	Year Built	Comments
Corbins Island Access: Comfort Station		288	W	1976	
Raystown Dam: Comfort Station		375	W	1973	
Residence #1	Dwelling	1,250	EWB		Electric Heat
Residence #2	Emergency Operations	1,250	EWB		Electric Heat
Maintenance Bldg. Pole Barn	Shop/Office Storage	1,872 720	EWB		Electric Heat
Snyder's Run Boat Launch: Comfort Station		288	W	1975	
Susquehannock Campground: 2 Comfort Stations		280 ea.	W	1976	
Administration Building		1,856	EWB	1974	Electric Heat
Seven Point Recreation Area: Pole Barn	Storage	1,800		1976	
Ranger Station	Entrance	898	EWB		Electric Heat
Bath House	Concession & Bath	4,320	EW		
Ridge Camp	Comfort Stat.	920	W		
Valley Camp	Comfort Stat.	280	W		
Point Camp	Comfort Stat.	280	W		
Bay Camp	Comfort Stat.	434	W		
Big Meadow Camp	Comfort Stat.	434	W		
Picnic Areas	8 Comfort Stat.	434 ea.			
2 Picnic Shelters		1,069 ea.			
Picnic Shelter		1,024			
Maintenance Bldg.	Shop/Office	4,020	EWB		
Storage Bldg.	Emergency Mgt.	289			
Sewage Plant		1,708			
Wellhouse #1		644			
Wellhouse #2		1,721			
Aitch Access: Comfort Station		280	W	1976	
James Creek Boat Launch: Comfort Station		288	W	1975	
Nancy's Camp: Comfort Station		288	W	1975	
Tatman Run Access: 2 Comfort Stations		280 ea.	W	1975	
Paradise Point: 2 Comfort Stations		280 ea.	W	1976	
Weaver Falls Access: Comfort Station		280		1976	
Tussey Mountain: Metal Bldg.	Radio Tower	63		1979	

Shy Beaver Boat Launch:			1975	
2 Comfort Stations	280 ea.			
Lake Raystown Resort:			1978	
Entrance Station	279	EHW		Electric Heat

6 Comfort Stations	288 ea.	W		
2 Comfort Stations	920 ea.	W		
Camp Shelter	1,069			
Maintenance Bldg. Shop	1,375	EHW		Electric Heat
Water Treatment Plant	1,595	W		
Sewage Plant	1,708			
Pumping Station	864			
Storage Barn	64			

**\*\*KEY\*\***  
H = heat  
E = electric  
W = water

f. Project Purpose: Raystown Lake Project is a major element in the Susquehanna River Basin flood control system. The purposes of the project are to provide flood control, general recreation and enhancement of downstream fisheries through maintenance of minimum flows. In addition, the authorizing act prescribed the acquisition of additional lands to mitigate the loss of wildlife habitat resulting from the project. These lands are managed by the Pennsylvania Game Commission.

g. Number and Type of Personnel:

- 1 Park Manager - permanent
- 1 Supervisory Park Ranger - permanent
- 2 Secretaries - permanent
- 1 Secretary - permanent part time
- 4 Park Rangers - permanent
- 1 Maintenance Worker Foreman - permanent
- 2 Maintenance Mechanics - permanent
- 2 Maintenance Workers - permanent
- 1 Water Treatment Plant Operator - permanent
- 1 Water Treatment Plant Helper - permanent
- 1 Sewage Disposal Plant Operator - permanent
- 1 Laborer - permanent

h. Requirements:

- 8 Pickup Trucks
- 1 Van
- 1 Stake Truck
- 1 Snow Blower
- 4 Utility 4 wheeled drive vehicles
- 1 9' Angling Plow
- 1 5 ton dump truck
- 1 Front End Loader
- 1 Trailer
- 2 Mowers
- 1 Carryall
- 1 Garden Tractor
- 4 Tractors
- 3 Sprayers

2 Snow Plows  
1 Road Grader  
4 Boats and Motors  
Maintenance Tools  
Office Equipment

i. Current Utilization of Property:

(1) Flood Control - A total of 28,407.64 acres were acquired in fee for flood control along with 653.18 acres of flowage easements. Another 37.35 acres were acquired in fee for an overlook area and 45.42 acres were acquired for channel, highway, and temporary easements. Not included in the Government's acquisition was the original riverbed, which totaled 1,467.33 acres fee and 146.48 acres flowage easements making a total project acreage of 30,757.40 acres. The area is comprised of the following:

PROJECT ACREAGE STUDY

Dam Site and Downstream:

1,490.68 acres fee  
143.33 acres fee original riverbed

Area Below Elevation 786 msl:

6,775.64 acres fee  
1,324.00 acres fee original riverbed

Area Between Elevations 786 msl and 812 msl (which is the spillway elevation):

2,059.70 acres fee  
234.98 acres flowage easement  
146.48 acres flowage easement original riverbed

Area Between Elevations 812 msl and 822 msl or Boundary (which is the maximum pool surface elevation):

858.74 acres fee  
183.63 acres flowage easement

Area Between Elevation 822 msl and Boundary:

17,222.88 acres fee  
234.57 acres flowage easement

Areas Outside Project:

Overlook - 37.35 acres fee  
2.38 acres channel easements  
40.79 acres highway easements  
2.25 acres temporary easements

Previous Disposals and Terminations:

8.89 acres fee  
2.25 acres temporary easements

ORIGINAL - Project Totals 30,757.40 Acres

(2) Recreation - At present, 2,622 of the total project acres are set aside for recreation utilization and development. This includes areas for various types of public access for picnicking, camping, boating, hiking, and other related activities. Visitation for 1986 by month is as follows:

1986 Visitation by Month

January	14,100
February	11,900
March	41,700
April	62,600
May	154,200
June	253,500
July	354,800
August	287,200
September	98,000
October	66,700
November	29,000
December	22,400

TOTAL: 1,396,100

(3) Downstream Enhancement - Approximately 1,490.68 acres fee were acquired downstream of the dam.

(4) Wildlife Mitigation - Approximately 1,470 acres were specifically acquired for wildlife mitigation, however a total of 3,018 acres of land and water are currently licensed to the Pennsylvania Game Commission for wildlife management.

(5) Current Holdings:

a. Disposal Data - Since the original acquisition four tracts of fee property have been disposed of totaling 8.89 acres and 2.25 acres of temporary work easements have terminated.

b. Table of Pertinent Data

Pool	Elevation	Acres (fee)	Acres (easement)	Total Acreage
Normal Pool	786	8,099.64		8,099.64
Flood Control Pool	812	10,159.34	381.46	10,540.80
Bottom of Freeboard	822	11,018.08	565.09	11,583.17

Top of Freeboard Area above Freeboard (between elevation 822 and boundary)	N/A	N/A	N/A	N/A
Area above Freeboard (between elevation 822 and boundary)	N/A	17,222.88	234.57	17,457.45
Areas Outside Project	N/A	37.35	2.38	39.73

c. Utilization by Category

Flood Control	11,018.08 fee	799.66 easement
Dam Site and Downstream Enhancement	1,634.01 fee	
Wildlife Mitigation	3,018.00 fee	
Recreation:		
Intensive Use	1,739.00 fee	
Low Density Use	883.00 fee	
Natural Areas	2,270.00 fee	
Reserve Forest Land	9,341.34 fee	
Easements Outside Project:		
Channel Easements		2.38 easement
Highway Easements		40.79 easement
Previous Disposals and Terminations	8.89 fee	2.25 easement

ORIGINAL PROJECT TOTAL: 30,757.40

d. Current Utilization - The project is made up of the following use areas:

The Flood Control Area includes all fee land upstream from the dam and below full flood elevation 822 msl.

The Dam Site and Downstream Enhancement Area includes the dam structure, dam tender residences, a small recreational area and all remaining lands downstream from the dam.

The Wildlife Mitigation Area was specifically authorized by Congress and is leased to the Pennsylvania Game Commission for wildlife management purposes.

The Intensive Recreation Areas include those portions of the major recreation areas at the project, such as Susquehannock Campground, Seven Point Recreation Area, Nancy's Campground, Tatman Run Boat Launch, and Lake Raystown Resort, which are above the 822 contour. The acreage does not include some of the smaller areas such as the public boat launches and Aitch Day Use Area because most of them are situated below elevation 822 msl.

The Low Density Recreation Areas include those areas that buffer the intensive recreation area or have recreation development related to non-intensive use such as hiking and interpretive trails and hunting areas.

Natural Areas are those lands allocated for the preservation of scientific, ecological, historical, archeological or visual value.

Reserve Forest Land has been set aside to be managed for the enhancement and protection of watershed, wildlife, and recreation resources.

j. Prospective Utilization of the Property: At this time there are no firm future plans for a change in utilization of any of the property on the project.

### 3. Findings

a. Not Utilized - Two areas downstream from the dam are not needed for project purposes. The first area is to the west of Corbins Bridge (see plate 16-27) and contains approximately 88 acres. The second area is to the east of Fishing Access Point No. 2 (see plate 16-28) and contains approximately 83 acres. Both parcels were acquired as uneconomic remnants and are not needed for downstream flood control purposes.

b. Underutilized - There are several areas throughout the project which the master plan designates as major high density recreational areas which have not been developed due to a lack of funds. During the interim period, the areas are available for agriculture, hunting and low density recreation. Beginning at the dam and proceeding upstream the undeveloped areas are as follows: on plate 16-28 Haws Bridge Woods Marina and Seven Points Camping Area North. On the bottom of plate 16-29 and top of plate 16-30 Upper Corner Lodge. Also on plate 16-30 is the Paradise Furnace Recreation Area. On plate 16-31 Allegrippis Ridge Camping Area and on plate 16-32 the Hopewell Recreation Area is shown. As funds become available, or as demand dictates, the areas will be developed either with Federal funds or private capital through concession leases or by leasing to state or local government agencies.

c. Overutilized - Each year since the project opened, total visitation and particularly camping and boating visitation has increased. Last year all boat launching areas were closed at 11:00 am on most Sundays during the season due to excessive boat launching activity. The major campgrounds, Seven Points, Susquehannock and Nancy's Camp turned campers away on 50-75% of the in season weekends. Weekends are considered to begin on Fridays and end on Sundays. For this reason the District advertised and leased the Rothrock Area for the private development of additional camp sites and a marina. The concession was awarded to R.R.P. Enterprises in 1984 and has been developed into Lake Raystown Resort. All campgrounds around the project continue to turn away campers on heavy use weekends.

**4. Recommendations**

a. It is recommended that the two parcels mentioned in Paragraph 3a above be reported excess. A 1000 foot horizontal buffer should be maintained from the river for environmental and recreation purposes. An identification of any cultural resources will have to be made to comply with Section 106 of the National Historic Preservation Act before any excess is taken.

b. The Township Road, which provides access to private property west of Hopewell Recreation area, south past Weaver Falls Day Use Area, floods when the lake reaches elevation 794 msl. In the past ten years the road has flooded twice for a two day duration on each occasion. Currently 5 to 7 private land owners are denied access when the road floods. To permanently solve the situation, either LR 31019 would have to be relocated or the private properties acquired. Either solution would be very costly which is the reason our recommendation is to allow the situation to exist as is. However, the Corps should be aware of the area during high water and monitor it carefully while the road is flooded.

c. Access to the Hopewell Recreation Area is by way of LR 31019 mentioned in 4b above. Referring to sheet 3 of 3 of the enclosed real estate maps, private property is between the road and the first portion of the recreation area labeled Group Camp. Acquiring access to the Group Camp area across the private property would alleviate very costly construction of a road almost twice the distance if access to the area remained on Government property. Since the fee acquisition of a strip of land across private property would be substantially less than the longer road construction, we recommend the additional acquisition of an area shown on sheet 3 of 3 entitled Real Estate.

**5. Certification**

a. The inspection was made with the following personnel:

Craig R. Homesley	Realty Specialist
Wayne M. Freed	Acting Park Manager, Raystown Lake

b. Approval:

## **1. PURPOSE**

This survey of the Raystown Lake Project (RLP), Huntingdon County, Pennsylvania was conducted pursuant to provisions of Executive Order 13327 of February 4, 2004, Federal Real Property Asset Management which supersedes Section 2 of Executive Order 12512 as prescribed by subpart 101-47.8 of the Federal Property Management Regulations (FPMR). This survey was made to identify, as appropriate, those areas of real property which were found to be not utilized, underutilized, or not being put to optimum use, as defined in Executive Order 13327.

## **2. UTILIZATION**

### **a) Findings**

- i. **Not Utilized.** It has been determined by the Baltimore District Office of Real Estate and other technical field experts that there were no findings in this survey of real property areas not utilized as defined in Executive Order 13327.
- ii. **Underutilized.** It has been determined by the Baltimore District Office of Real Estate and other technical field experts that there was one finding of real property areas underutilized at the RLP as defined in Executive Order 13327. Two areas downstream from the dam are not needed for authorized project purposes. The first area, tract number 140, is to the west of Corbin's Bridge and contains approximately 88 acres. The second area tract number 143, is to the east of Fishing Access Point No. 2 and contains approximately 83 acres. Please see Exhibit 7-1 for an aerial map of both excess tracts. Both tracts were acquired from the Pennsylvania Electric Company as uneconomic remnants and are not needed for downstream flood control purposes. These parcels were reported as excess to the General Services Administration (GSA). Although GSA disposed of a number of parcels of land declared excess at Corps lakes around the country, it declined to dispose of the parcels described above at Raystown Lake for reasons that are unclear. Any future disposal action will follow all guidance and procedures set forth in Chapter 11 of ER 405-1-12.
- iii. **Optimum Use.** It has been determined by the Baltimore District Office of Real Estate and other technical field experts that there were no findings in this survey of real property areas not being put to optimum use as defined in Executive Order 13327.

### **3. PROJECT PURPOSE**

The entire RLP has a land allocation of Flood Risk Management, Recreation, Hydroelectric Power, Fish and Wildlife Conservation, downstream low-flow augmentation and Environmental Stewardship.

In addition, the authorizing act prescribed the acquisitions of additional lands to mitigate the loss of wildlife habitat resulting from the project. These lands are managed by the Pennsylvania Game Commission, which contributes to Executive Order 13508 goals to protect habitat and water quality, and expand public access within the Chesapeake Bay watershed.

### **4. PROJECT AUTHORIZATION**

The RLP was authorized by the Flood Control Act of 1962 (P.L. 87-874), in accordance with the recommendations of the Chief of Engineers as presented in House Document No. 565, 87<sup>th</sup> Congress, 2<sup>nd</sup> session. Construction of the dam and outlet works began in 1968 and was completed in 1973.

### **5. LAND ACQUISITION**

The original 28,141.693 acres of fee title land and the 689.51 acres of flowage easements were acquired from 1968 to 1978 through purchase and condemnation. The criteria used for the acquisition provided for fee taking of an entire area to the height which maintains reasonable freeboard over the spillway crest at elevation 812 National Geodetic Vertical Datum (NGVD). For this purpose, the fee taking guideline was established at elevation 815 NGVD or 300 feet horizontal distance from elevation 812 NGVD, whichever was greater. The taking line generally followed property lines or other boundaries rather than the actual contour line. A total of 8,877 acres were acquired in fee for public access, 1,470 acres above the guide taking line were acquired for wildlife mitigation. Downstream of the dam 374 acres were acquired to permit construction of the dam access road. Another 37.35 acres were acquired in fee for an overlook area.

## 6. AUDITED LAND ACQUISITION

### Exhibit 1-1: Realty Control Summary (Land Acquisitions and Disposals)

REALTY CONTROL FILE SUMMARY (Land Acquisitions and Disposals)				DATE OF (RE)AUDIT 17 Oct 1997	AUDIT NO. BALT-2-0027

* Nominal charges of \$13, Admin 01 \$4,881,405.30, and Admin 02 \$7,980,000 costs not recorded in file but added to REMIS.					

ENG FORM 1603  
JAN 88

REPLACES EDITION OF 1 MAY 59, WHICH IS OBSOLETE.

(ER 405-1-12)

\*Land acquisition acreages were derived using historical files from the Baltimore District Real Estate Office and reflect the official acreage of RLP.

\*The Realty Control Summary Audit (BALT-2-0027) of RLP was completed on 17 October 1997 and is regarded as the official land ownership and cost data information.

## **7. MINERAL ACTIVITY**

There are three tracts which total 0.71 of an acre, less than .003% of RLP land ownership, that are subject to an individual 1/3 interest in all mineral deposits. All mineral exploration and extraction are subject to Army Regulation 405-30. Mineral exploration and exploitation on civil works lands at RLP will follow ER 405-1-12 Section 8 paragraph 119.

## **8. HYDROPOWER**

Continental Cooperative Services of Harrisburg, PA owns and operates a 20 megawatt conventional hydropower facility that uses scheduled water releases from Raystown Dam to produce an average annual output of 77 million kilowatt hours, or enough to supply approximately 7,700 typical rural homes. The facility became operational in the spring of 1988.

## **9. LAND ALLOCATION**

Land Allocation is defined as the congressionally authorized purpose for which the project lands were acquired. A project map is attached delineating land according to the following allocations. There are only four land allocation categories applicable to the U.S. Army Corps of Engineers (USACE). Please reference Exhibit 6 for a general map of RLP.

- a. **Operations.** (i.e., flood control, hydropower, etc.). Lands acquired for the congressionally authorized purposes of constructing and operating the project. Most project lands are included in this allocation.
- b. **Recreation.** Lands acquired specifically for the congressionally authorized purpose of recreation. These are referred to as separable recreation lands. Recreation lands in this allocation can only be given a land classification of "Recreation."
- c. **Fish and Wildlife.** Lands acquired specifically for the congressionally authorized purpose of fish and wildlife management. These are referred to as separable fish and wildlife lands. Lands under this allocation can only be given a land classification of "Wildlife Management."
- d. **Mitigation.** Lands acquired or designated specifically for the congressionally authorized purpose of offsetting losses associated with development of the project. These are referred to as separable mitigation lands. Lands under this allocation can only be given a land classification of "Mitigation" and cannot change future classification unless congressionally authorized.

## **10. LAND CLASSIFICATION**

Land classification designates the primary use for which project lands are managed. Project lands are zoned for development and resource management consistent with authorized project purposes and the provisions of the National Environmental Policy Act (NEPA) and other Federal laws.

- a) **Project Operations.** This category includes those lands required for the dam, spillway, offices, maintenance facilities, and other areas that are used solely for the operation of the project. RLP has 241.71 acres in this classification.
- b) **High Density Recreation.** RLP has 1,067.03 acres of lands developed for intensive recreational activities for the visiting public including day use areas and/or campgrounds. These could also include areas for concessions (marinas, comprehensive resorts, etc.), and quasi-public development.
- c) **Mitigation.** Mitigation land classification will only be used for lands with an allocation of Mitigation, and acquired specifically for the purposes of offsetting losses associated with development of the project. RLP currently owns 2,653.77 acres of mitigation land and it is important to note that this land cannot be re-classified unless specifically authorized by congress.
- d) **Environmentally Sensitive Areas.** These are areas where scientific, ecological, cultural or aesthetic features have been identified. Designation of these lands is not limited to just lands that are otherwise protected by laws such as the Endangered Species Act, the National Historic Preservation Act or applicable state statutes. These areas must be considered by management to ensure they are not adversely impacted. Typically, limited or no development of public use is allowed on these lands. No agricultural or grazing uses are permitted on these lands unless necessary for a specific resource management benefit, such as prairie restoration. These areas are typically distinct parcels located within another, and perhaps larger, land classification, area. RLP lists 507.82 acres classified as Environmentally Sensitive.
- e) **Multiple Resource Management Lands.** This classification allows for the designation of a predominate use as described below, with the understanding that other compatible uses described below may also occur on these lands. (e.g. a trail through an area designated as wildlife management.) Land classification maps must reflect the predominant sub-classification, rather than just Multiple Resource Management.
  - i. **Low Density Recreation.** These 2,653.77 acres of land are designated for dispersed and/or low impact recreation use. Development of facilities

on these lands is limited. Emphasis is on providing opportunities for non-motorized activities such as hiking, biking, fishing, sight-seeing, or nature study. Some limited facilities are permitted, including trails, parking areas and vehicle controls, as well as primitive camping and picnic facilities.

- ii. **Wildlife Management.** These 7,012.26 acres of land are designated specifically for wildlife management, although all project lands are managed for fish and wildlife enhancement in conjunction with other land uses. Wildlife management lands are actively managed or enhanced to create valuable habitat suitable for game and/or non-game species. These activities are conducted as identified by the managing agency's forest and wildlife management plans.

Wildlife lands are available for dispersed uses such as sightseeing, wildlife viewing, and nature study, hiking, and biking. Consumptive uses of wildlife, such as fishing, are encouraged when compatible with the wildlife objectives for a given area and with federal and state fish and wildlife management regulations.

- iii. **Vegetative Management.** Management activities in these 5,466.96 acres focus on the protection and enhancement of forest resources and vegetative cover. The USACE conducts active vegetation management activities, protects water quality, improves aesthetics, and enhances wildlife habitat.

- f) **Future and Inactive Recreation:** This sub-classification consists of 1,698.85 acres of land for which recreation areas are either currently in the planning stages, are held in an interim status for future recreation possibilities, or lands that contain existing recreation areas that have been temporarily closed. The lands are managed for multiple purposes including wildlife and vegetation management and low density recreation until if and when they are developed as recreation areas.

- g) **Water Surface.** Water surface classifications are designed to operate similar to land classifications and serve to zone the different uses on the RLP waters.

- i. **Restricted.** There are 236.39 acres of RLP water surface restricted for project operations, safety, and security purposes. Typically this area may serve to keep the public a safe distance from flood risk management structures.

- ii. **Designated No-Wake.** There are 1,908.35 water surface acres in this classification to protect environmentally sensitive shoreline areas, recreational water access areas from disturbance, and for public safety.

- iii. **Fish and Wildlife Sanctuary.** Annual or seasonal restrictions on areas to

protect fish and wildlife species during periods of migration, resting, feeding, nesting, and/or spawning. RLP has classified 43.70 water surface acres in this restriction.

- iv. **Open Recreation.** Those waters available for year round water-based recreational use. This is the second largest water surface classification at RLP and includes 6,144.05 acres.

**Table 1-1: Land Classification and Sub-classification Summary**

Land Classification Type	Subclassification	Acres
Project Operations		241.71
High Density Recreation		1,067.03
Mitigation		2,653.77
Environmental Sensitive Area		507.82
Multiple Resource Management	Low Density Recreation	2,694.36
	Wildlife Management	7,012.26
	Vegetation Management	5,466.96
	Future or Inactive Recreation Areas	1,698.85
Water Surface	Restricted	236.39
	No Wake	1,908.35
	Fish/Wildlife Sanctuary	43.70
	Open Recreation	6,144.05
Total		29,675.25

\*Please see the Land Use Classifications in Appendix C of the RLP Master Plan or Exhibit 2 of the Land Utilization and Inspection Report for a detailed list of RLP land sub classification, acres and notes.

\*Land classification acreages are derived from geographic information system technology and do not reflect the official land acquisition records as seen on Exhibit 1-1.

## **11. PROJECT EASEMENT LANDS**

This Classification is for all lands for which the USACE holds an easement interest, but not a fee title. Planned use and management of easement lands will be in strict accordance with the terms and conditions of the easement estate acquired for the project. Easements are acquired for specific purposes and do not convey the same rights or ownership to the USACE as other lands.

- a) **Channel Improvement Easement.** The USACE retains rights to these lands necessary for project operations.
- b) **Flowage Easement.** The USACE retains the right to inundate these lands for project operations.

- c) **Perpetual Highway Easement.** The USACE retains rights to lands for aesthetic, recreation and environmental benefits.
- d) **Temporary Work Area Easement.** The USACE retains rights in a designated area to perform work for a specific amount of time.

Flowage easements acquired give the government a perpetual right to inundate land when necessary as a result of construction, maintenance, and operation of the project. The government also has the right to enter the easement lands as needed as well as to remove from the easement lands any natural or manmade obstructions or structures which, in the opinion of the government, may be detrimental to the operation and maintenance of the project. It has been the USACE policy to prohibit structures for human habitation on flowage easements.

**Table 2-1: Easement Acreage Spreadsheet Summary**

<b>Easement Acres</b>	<b>Perpetual Flowage Easement</b>	<b>Perpetual Channel Improvement Easement</b>	<b>Perpetual Highway Easement</b>	<b>Temporary Work Area Easement</b>
<b>Total:</b>	<b>655.09</b>	<b>2.38</b>	<b>40.79</b>	<b>2.25</b>

\*There is a discrepancy between the segment map data and the Realty Control Summary (Exhibit 1-1) of 11 acres of easement land. The Realty Control Summary Audit (number BALT-2-0027) of Raystown Lake was completed on 17 October 1997 and reported a net total of 687.260 acres of easement property. This audit is regarded as the official total acreage of Raystown Lake.

\*Please see Table 4-1 located in the Appendix for a detailed easement spreadsheet.

## **12. OUTGRANTS**

- a) **Outgrants:** An outgrant is any real estate instrument used to convey an interest or temporary use of project land. Types of out grants issued at Raystown Lake are leases, licenses, permits, and easements.
- b) **Leases:** An agreement by which an owner of real property (lessor) gives the right of possession to another (lessee), for a specified period of time (term) and for a specified consideration (rent).
- c) **Licenses:** A license grants authority to enter or use another's land or property without having ownership in it. The license is revocable at will and non-transferable. Action without a license constitutes trespass.
- d) **Permit:** A permit is a revocable privilege granted to another federal agency to use real property for a specific purpose without conveying possession.

- e) **Easements:** An easement allows one party to use certain lands of another party. An easement conveys an interest in the property. Rights-of-way are the most frequent easement requests for public land.
  
- f) **Encroachments:** The majority of encroachments on project lands are found to be adjacent landowners. Adjacent landowners sometimes expand their home based activities onto the USACE managed land without appropriate authorization. Occasionally, adjacent landowners will store machinery, construct gardens, build gates, or erect storage buildings on project land. These encroachments are usually minor in nature. Adjacent landowners sometimes find it difficult to readily define project boundaries in some areas. This occasionally results in unintentional encroachments.
  
- g) **Consent:** The servient estate holder may grant additional easements or other lesser interest over land where the United States owns an easement interest or other lesser interest. The United States may consent to use of a subsequent easement, subject to any conditions required to protect the Government's easement interest.

**Table 3-1: Real Estate Instrument Summary**

<b>Real Estate Instrument (Outgrant)</b>	<b>Number</b>
Consent	8
Easement	70
Lease	11
License	17
Other	1
<b>Total Outgrant Acres</b>	<b>4,055.23 Acres</b>

\*Please Reference Exhibit 5 for a more detailed list of outgrants.

### **13. OUTLEASE TITLE 16 U.S.C. 460D**

The 1944 Flood Control Act (16 U.S.C. § 460d) authorized the Secretary of the Army to enter into licenses at water resource development projects for recreational development and other public uses. This law created a new authority which allowed longer term uses with nominal consideration and preferences to other federal, state or local governmental agencies.

The primary objective in leasing lands for commercial concession purposes is to obtain recreational services and facilities to meet the public demand at reasonable charges without federal expenditure to provide such facilities and services. This purpose will be achieved only when the concessionaire has an opportunity to make a fair profit. The private entity operating a commercial concession situated entirely on project land is referred to as a concessionaire.

Leases may be granted for terms of 25 years or less, with an option for renewal, conditioned upon the lessee being in compliance and satisfactorily performing at the time the option is exercised. The term should be given as necessary for the lessee to obtain a return on the investment and make a reasonable profit. The maximum permissible term should not automatically be granted. Options should not routinely be placed in leases, but should be based on the development proposed and rehabilitation and replacement cycles for the facilities and improvements. If an option is desired, the Government may extend the original term of the lease for two (2) successive periods (“extension terms”) of fifteen (15) and ten (10) years each. Request for terms over the above must be forwarded to HQUSACE for approval. Total terms of over 50 years (25 years, 25 year option) will be approved only for the most extensive development. Submissions to HQUSACE must include supporting justification.

Improvements and buildings constructed on leased lands by the grantee are included in the Project Inventory Report but are transferred by hand receipt to the Operations Project Manager.

Buildings and structures, including such items constructed on leased land to which the Government retains title, are capitalized on the basis of original costs plus the cost of additions, betterments, rehabilitation, or replacements which extend the useful life of the building or structure.

A betterment is a change to an existing asset that results in an increase of efficiency, durability, or capacity of the property item. This includes improvements to structures by replacement or modification of existing property. Betterments will be capitalized if they meet the basic capitalization criteria threshold.

#### **a) Raystown Outlease and Concessions**

- i. **Branch Camp.** The Branch Camp concession is located two miles below the dam on the Juniata River. Facilities include a 31 site campground, vault toilet, and potable water.
- ii. **Lake Raystown Resort.** This concession area includes 350 acres on 3 peninsulas on the east shore of Raystown Lake just south of Pennsylvania Route 994. The concessionaire is the Patt Organization of Hollidaysburg, PA who manages the property through RVC Outdoor Destinations. The concessionaire operates the following facilities: 272 site campground, 650 slip marina, 54 unit lodge/motel, conference center, restaurant, 64 cabins, water park complex, camp store/administration building, gas station, tour boat, and rental boats.

- iii. **Seven Points Marina.** This marina is operated by Anchorage Enterprises, Inc. of Hesston, Pennsylvania. Facilities operated by this concession include a 663 wet slip marina, 283 dry slips in stack storage, a camp store, two cruise boats, rental boats, and a fuel and boat service building. The marina also operates a restaurant facility.
- iv. **The Lighthouse.** The Lighthouse concession is located at Seven Points Beach. The facility offers a variety of snacks, fast food items, and water trampolines for visitors to the beach area.
- v. **Putts Camp.** The Putts Camp concession is located downstream of the Weaver Falls recreation area off of Tressler Road and is currently leased to the Friends of Raystown Lake (FRL). The FRL works to operate the camp for Boy and Girl Scouts, Church groups, and other non-profit groups with supporting services from Boy Scout Troop 471 of Saxton, Pennsylvania. The Putts Camp lease includes approximately 20 acres for park and recreational opportunities.

Please reference Exhibit 3 for a list of betterments/improvements.

#### **14. REAL PROPERTY ACCOUNTABILITY**

The USACE commander assigned a real estate mission will designate in writing a person from the Real Estate Division, other than the Chief of Real Estate, to serve as the Real Property Accountable Officer (RPAO). The appointing commander may determine any qualifications felt necessary for the position. The current RPAO is Jennifer Szymanski.

The RPAO will maintain the records designated in this chapter and such other records as may be necessary to account for USACE real property or to support record entries.

AR 735-5 specifies that real property must be physically inventoried at least once every three years.

An inventory should be performed by the RPAO to initially establish the accountability records. The RPAO should ensure the results of the inventory are reconciled with the financial accounting records. The most recent inventory was conducted on June 6<sup>th</sup>, 2017.

\*Please reference Exhibit 4 for Real Property Accountability Report.

## 15. Approval

I am satisfied as to the completeness of this real property account, and do, on this date assume responsibility for the real property (with the exception of real property outgranted to others) listed on the preceding pages of this inventory record, subject to the changes and remarks noted and initialed on those pages. The lessees are responsible for the use and return of the leased property in accordance with the terms of the lease. This inventory represents a cooperative effort on behalf of the Real Estate Division and the Project Office and to the best of my knowledge all government-owned improvements are accounted for on this inventory.
